Mr. Alexander's action leaves onanswered ques tions about civil-rights low, educational policy, and the politics of the ruling. By the first week in March, responses to the proposals must be in. Yet no matter what they are, no mutter what the Secretary's final regulations ultimately are, the issue of affirmative netiun will still be with us-hecnuse educational inequitics will still be with us

The birth of affirmative action in the late 1960's and 1970's was a struggle. Its most principled opponents argued honombly that American law and public policy oughl to be color-blind. Anything that was limited to one race, no matter how well intentioned, was wrong Unfortunately, not every opponent was principled. The argument about affirmative action also was divisive and prejudicial, a misinformation campaign that demonstrated more hostility about a remedy far injustice than about the injustice itself.

After the 1970's, the struggle became leas rancorous in higher education. Indeed, during the 1980's, the Department of Education received fewer than a dozen inquiries or complaints about race-specific scholarshipa. However, during the same decade, the opposition to affirmative action gained two weapons. First, the elections of Ronald Rengan and George Bosh to the Presidency permitted lower federal officials to translate ideological opposition to affirmative action into practice. Second, some highly accomplished African-American intellectuals began to criticize the programs that had, ironically, often aided their education.

Of these writers, I find the most persuasive to be Stephen L. Carter, the Yale Law School professor and author of Reflections of an Affirmotive Action Baby (BasicBooks, 1991). Speaking to a black audience, he defends the right to dissent from communal orthodoxles. Speaking to people like me, he claims that affirmative action has had its day. To its credit, affirmative action has nurtured a black middle class. Carter says. but its members pay the pace of being stigmatized as people who made it only because of that remedy.

Given the persistence of the resistance to affirmative action, it might be tempting to toas up one's compliance plans and agree that affirmative action has gone astray, over the top, beyond the pale. Certainly, it has not brought a paradise of equity, and its administration has often been clumsy. Institutions have made some bad, cynleal faculty hires and admitted some students without sufficient preparation and support. A very few facolty members and studenta have ripped off the system by manipulating it, for example by playing on racial guilt. I have occasionally grouned at the ways of bu reaueraev as I have read and written affirmative-action

Despite all this, affirmative action has not gone astray. If anything, it has been driven astray by sloppiness, indifference, and belligerence. I have heard faculty members and administrators any biased things about women and minorities and deliberately ignorant things about affirmative action, such as "it's forcing quotes down my throat"-their bahavior revealing why affirmative action was necessary in the first place. I have listened to members of the same groups rationalize their inability to hire anyone other than a clone by blaming a "limited pool" of minority candidates or the

"dual career" demands of women of all races. The important reality is this: Affirmative action has worked. To be sure, it has jumbered and creaked. It has worked slowly, unevenly, and incompletely-particularly when support for equity has been mean and opposition to it lavish. Arguably, it has worked least well for black males. Nevertheless, affirmative action has served us.

The process of doing sffirmstive action has demonstrated that the pool of qualified candidates was wider and deeper than the academy had previously admitted. The process also has released talent and industry. Think, for example, of the career of Dolores E. Cross. At 19, she was married, a clerk at the Newark Baard of Education, pregnant with her second child, She entered college in 1955, received her Ph.D. in 1971, and is now the president of Chicago State University.

REOVER, as the heroic example of President Cross shows, the academy now has greater diversity among students, staffs, and fsculties. In 1990, the United States awarded the prestest number of doctorates ever-36.027, From 1960 to 1990, the proportion of women esrning them increased from 11 per cent to 36 per cent, including more women from every racial group.

Yet, even if affirmative action has not gone astrny, it is time to rethink it. This proposal is not a craven mission to the anti-affirmative actioneers but the recognition of snother reality: Affirmative action was the creation of a historical period, meant to hesl its historical problems. Then, despite the passage of several civil-rights laws, virtually no members of minority groups and only a handful of white women were being

"A broad review is due, a rethinking that avoids both the easy comforts of hysteria about any change and the denunciation of affirmative action's mere existence."

allowed to advance in predominantly white institutions. This period is receding. The problems have mutaled. One reason they have done so is that affirmative action did work to a degree, because It did help to nurse affirmative-actian hables.

In 1975, the Carnegie Council on Policy Studies In Higher Education foresaw such an evolution. Its valuable study, "Making Affirmative Action Work in Higher Education," describes affirmative action as a "transitian period between actual past deficiencies af major proportions and potential future achievements of true equality of opportunity." Because affirmative action is such a transitional program, the book concluded that it needs periodic reviews to see "what amount and kind of federal involvement is still necessary.

In the harsh early light of the 1990's, a broad review is due, a rethinking that avoida both the easy comforts of hyateria about any change and the denunciation of affirmative action's mere existence. Rethinking entails seven steps:

Reinvigorating the purpose of affirmative action, which was to remove prejudice and open the gates of higher education. Today, because class and the economy, perhaps es much as race, are cloaing these gates, the process should take a student's economic background into account, in addition to minority status.

 Enlarging the meaning of affirmative action. Narrowly construed, it is a legally mandated employmen practice. Broadly construed, it is the umbrella term for all the programs that reflect a community's commitment to equity. The broader the construction, the more auccessful the practices for advancing underrepresented groups seem to become

■ Creating a national "equity ledger" setting out what equity means in student admissions, finoncial aid and retention and what it means in employment. We should rigorously examine all the preferences that now exist in these areas. We would then ask who breathes deeply enough of the nir of equity on that fabled site. the level playing field, to drop the oxygen mask of affirmative action-and, crucinlly, who does not.

. Strengthening the links among various kinds of schools and eolleges. Disadvantaged junior-high and high-school students feel more comfortable in college if they have some experience of college-even a visitbefore they get into first-year English, Commusitycollege students need good transfer programs to fouryear institutions; many poor and for minority students are in community culleges. For example, the number of Asian Americans enrolled in all higher education gree from 198,000 in 1976 to 497,000 in 1988. Most of these students attend public institutions, and almost one-half are in a two-year college.

Murturing the historically black colleges and universities. Of the baccalaureate institutions in the United States whose minarity graduates went on to cara Ph.D.'s between 1986 and 1990, 17 of the top 20 were historically black colleges and universities. The other three were urban institutions: Whyne State University. City College of the City University of New York, sno New York University. At Howard and Humpton, Spelmnn and Fisk ure muny of the next generation of black scholurs, researchers, and touchers.

Remembering the obvious, that the purpose of higher education is education. Thus, retainking affirmutive action means accepting the new scholarship about women and sender, race and ethnicity, domina tion and freedom, class, and sexuality. The syllabiafan equitable community will reflect these intellectual movements, not because faculties are filled with Dr. Feelgoods of thought, but because they are thoughtful.

Expanding, with more pussion than many of us in higher education have shown, affirmative action for children. Any rethinking for higher education is chaff unless we feed, shelter, love, and educate all children. In my neighborhoud is Scotty, u retired man and shrewd observer, who gets his coffee and hangs out at the delicatessen next to my Victorian house. For two years, Scotty has babyent for a husky, bright little kid, Luther, the child of a single, working mother. Recently, when I had not seen Luther with Scotty for aeveral days, I asked where Luther was. "Oh," said Scotty, with relief, pride, and huppiness, "he got into the Head Start program. He's in that Head Start. He's on his way." Here, in my neighborhood, is a dollop of affirmative action for children. How many neighborhoods have programs for a Luther?

N ADRIENNE RICH'S NEWEST BOOK, she has a title poem, "An Atlas of the Difficult World." There she writes of the waste of "those who could bind, join, reweave, cohere, replenish . . . those needed to teach, advise, persuade, weigh orguments/those urgently needed for the work of perception/work of the poet, the astronomer, the historian, the architect of

Affirmative action is a meritorious plon against ob scene waste. We need to rethink it so that it can better bind and reweave the present. If we fail to do so, we will have pushed it further astray, to be devoured by its enemies or to atrophy on a diet of inertia.

Cotharine R. Stimpsan is university professor and deon of the graduate school at Rutgers University at New Brimswick, This article was adapted from the 1991 Waodrow Wilsan National Fellawship Faundation annual lecture.

Enrollment Projections Revised Upward 16 مستقد المستقد المست in New Government Analysis A 13% increase, to 16 million, expected by 2002 A COLUMN CONTRACTOR CONTRACTOR CONTRACTOR CONTRACTOR CONTRACTOR CONTRACTOR CONTRACTOR CONTRACTOR CONTRACTOR CO 13 12 11 1987 1992 1997

By JEAN EVANGELAUF

WASHINGTON In findings that present a rusier outlank for college enrollments than previous studies did, the U.S. Department of Education estimates that the number of college students will climb from 14.1

million in 1991 to 16 million in 2002. The projected 13-per-cent increase is largely the result of rising college-encolliment rates and the growth, beginning in 1996, of the 18- to 24-year-old

A table detailing enrollment and other projections appears on Page A36.

53 Million Schoolehildren

The department has also revised upward its estimate of enrollments in elementury and secondary schools. By 1998, the number of schoolchildren will surpass the peak of \$1.3 million renched in 1971, and will climb to 53 million by 2002. Those projections are some 6 per cent higher than earlier ones because they take into account updated Census Bureau statistics indicuting increased fertility and immigration rates.

The new projections should help colleges conduct long-range planning, said Debra E. Gerald, a co-mathor of the report and a statistician with the depart-

When you look at what will be hap pening at the elementary and secondary schools, you see that the students are definitely going to be there," she said, "An important question for the colleges is whether they will be able to secure the funds to accommodate these peo-

Commenting on the projections, Eluine El-Khawas, vice-president for palicy analysis and research at the American Council on Education agreed that college enrollment would continue to climb.

"In our society, beginning workers need some college-level training," she said. "Johs für high-school graduates have dried up, and college training has become the new minimum.

For the first time, the department furecast college enrollment by racial and ethnic group. The figures, which the department termed "preliminary,"

go through 2000 only. They indicate that minority enrollment will grow faster than white enrollment, continuing the trend of the 1980's.

Over all, the proportion of enrollment made up of minority-group members is expected to rise to 22 per cent in 2000 from 20 per cent in 1991. That increase would be due in lurge part to growth in minority populations rather than to a rise in the college-attendance rates of those groups, Ms. Gerald said.

Shift in the Age Distribution

The number of female students will rise at twice the rate of male students. according to the department. From 1991 to 2002, female enrollment is not-Jected to rise 18 per cent, to nearly 9 million, while the number of nucle students will increuse 9 per cent, to 7 mililon. By 2002, women will necestat for 56 per cent of all college students, compared with 54 per cent in 1991.

A shift is expected in the use distribution of enllege students, with u growing proportion of them expected to be 35 Continued on Page A36

Plight of Russian Scholars in Weak Economy Prompts New U.S. Efforts to Support Them

By KIM A. McDONALD

Concern over the survival of Russian scholars in their country's deteriorotiag economy has prompted some American foundations and scholarly organizations to explore new ways to help.

Among the ideas being considered are competitive granta to Russian scholars or institutes, subcontracts to Russian researchers, and a system of "sister institutions" linking American universities with Russian institutes in cooperative research.

Most of the proposals have been crafted in recent weeks, in response to reports of deteriorating working conditions for Russian scholars and the threat of a massive emigration of Russian scientists and intel-

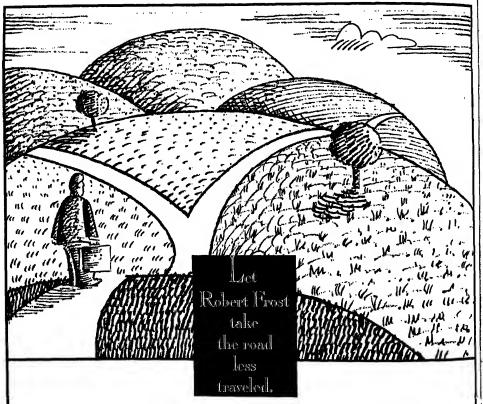

While the ideas for the new program have grown out of a concern for the academics' welfare, the assistance is intended to be much more than a humanitarian gesture. In disciplines in which Russians are acknowledged leaders, such as mathematics and theoretical physics, many American scholors may they fear the inability of key individuals to conduct research or the demise of certain institutes would eliminate important resources used by the resi of the world.

PORTRAIT

A Non-Traditional University Looks at Tradition

Charles E. Glasser: "We're defining ourselves in the context of the traditional models as wall as in the context of our own history. Wa're trying to extract the best of both."

By THOMAS J. DeLOUGHRY

ORINDA, CAL. John F. Kennedy University was s trail blazer in sdult education when it opened in 1965. Today it is still playing that role as it grapples with campus Issues that most tradi-tional colleges face well before

their 26th birthdnys. Founded in a mortuary in Martinez, Cal., the university has gradunted to renting a former gramma school and a former middle school here and some commercial space in enrby Walnut Creck. It has complemented its pool of more than 800 indjunet faculty members with 16 full-time faculty members-presenting new questions about campus governance and tenure.

The university also has alons to place Itself on firmer financial fooling by stepping up its fund raising. Officials wont the university to own a campus and to wenn itself from ita heavy reliance on tuition.

In short this non-traditional institution is striving to become a bit

"Here's a culture in the throes of dramotic change," onys Chorles E. full-time faculty membero in 1990 Ginssar, JFK's president since 1990. for the first time and by sharing "We're defining ourselves in the context of the traditional models as well us in the context of our own history," he says, "We're trying to extract the best of both."

Night and Weekend Classes

JFK has been non-traditional since its start, when it took the name of the late President to honor his commitment to education. Today its student population numbers 1 800 and has an average age of 37 Seventy per cent of its of emple and 70 per cent are enrolled in graduate programs that include man consciousness, law, management, museum studies, and psychology. The remainder are under graduates. Nearly all classes are eld at night or on weeker

I. Michael Heyman, a former chancellor of the University of Cal-Ifornia at Berkeley and an adviser to JPK, says the university's service to older women seeking advanced degrees has filled a "real impor-

ant" niche in higher education in the San Francisco Bay Area.

"I don't think we at the University of California are up to that," he "We don't know how to sculpt a program that would be useful and attractive to more than 2 or 3 per cent of that population.

Mr. Heyman, who is now a pro-fessor of city planning and law at Berkelsy, applauds the efforta JPK is making to expand the role of its faculty. "They're obviously trying to make themselves more solid in a tmditions! way," he says. He at-tributes the plana to an "inner comnulsion" among administrators to Improve the university's financial standing and curricula and to aressure from secreditors to involve faculty members in curriculum de-

Gail P. Solt, director of the university's sports-psychology pro-gram and president of its Faculty Senate, says the Western Associa-tion of Schools and Colleges did put pressure on the university to give

nore power to its faculty members. The university responded by hiring full-time faculty membero in 1990

power with the Faculty Senate.
"We have certainly come n long way," Ms. Solt says in desc the work the senate has done in esablishing committees to foculty grievances, discuss faculty compensation, and judge proposals for new courses. "We see ourceives as being responsible for the establishment and ongoing review

of the academie char Debate Over Teoure

White full-time faculty members are now being hired under one-year contracts, Ms. Solt and President Glasser both anticipate longer contracts in the future and a debate about whether tenure should be offered. Such a debate would come at a time when many people inside sod outside higher education are questioning whether tenure leads to complacency and diminished productivity.

tegrity of the university," ahe says,

"We're struggling with the is-

sue," says President Glassor, "We want to make sure we honur, recogulty commitment to the university. bill, at the same time, honor the

adjunct faculty." The effort to hire and retain fulltime faculty members will be expensive, Mr. Glasser says, explain ing that he would like to see the university win more grants from private foundations, A key to winning grants, he snys, will be to make the university bettar known outside those fields in which it has been recognized for having unique pro-

'Greater Self-Knowledge

The Graduate School for the Study of Human Consciousness may be the best known, nitracting students from across the country A brochure for the achool says its students are "interested in developing greater self knowledge ond exploring their own potential for

The school's focus has attracted some crities, as well. "Touchy feely, flaky Californian, blah, blah," President Glasoer says, mimicking those who, he says, hove unjustly poked fun of the school. He points out that a majority of the school'o students are in the transpersonal psychology program, which gives them experience in an Oakland counceling center and enables them to earn a muster's degree that fulfills a requirement a California Morriage, Family,

and Child Counselor license. Such criticisms are old hat for Robert M. Fisher, the executive director of the San Francisco Foundation, who served on JFK's president from 1974 to 1985. He sayoany university that teoches non-tradi tional courses in a non-traditional setting has to expect a few gibes from traditional college:

"I think alternative institutions have a very tough row to hoe through the eyes of traditional academe." he says. "I was used to riding in the back of the bus all those vears."

TAKE THE FUTURE IN YOUR HANDS.

When participants select from among the investment options in their retirement plan, they are taking an important part of their future into their hands.

The investment choices made available to them can have a strong impact on both their future and the future of our world.

Choosing The Dreyfus Third Century Fund, Inc., for your 403(b)(7) program gives you a socially conscious investment that benefits us all.

The Dreyfus Third Century Fund is a common stock fund that seeks capital

growth through investments in companies that not only meet traditional investment standards, but also contribute to the quality of life.

Before a stock is purchased for the Fund's portfolio, the company's record in the following areas is carefully evaluated: the environment; equal employment opportunity; consumer protection and

product safety; and occupational health and safety. In addition, stocks of companies operating in South Africa or manufacturing tobacco are barred from consideration.

For more information on The Dreyfus Third Century Fund, including management fees and expenses, obtain a Prospectus by calling a Dreyfus Retirement Specialist at 1-800-762-9533. You will also receive information on the Dreyfus 403(b)(7) Plan, featuring plan administration, employee education and

Group Retirement Plans

the Dreyfus Family of Funds. Please read the Prospectus carefully before you invest or send money.

Mathematicians Develop New Tools to Tackle Environmental Problems

Many of them want to play a larger role in such research

By DAVID L. WHEELER

Idling cars spewing fumes, northern spotted owls seeking nesting sites in diminishing plots of old-growth forest, and mode-eules of sulfur dioxide settling through the branches of the human lung. Such events would not strike most scientists as inherenty mathematical. But mathematicians using grapha, equations, and their own brand of abstract thinking, have been involved in ench of those problems and are seeking a larger role in other environmental research.

"Environmental mathematics is an altempt to get mathematicians to connect again with the natural world," says Ben A. Pissaro, u professor ut Salisbury State University und the charinano of the Mathematical Association of America's new commitee on muthematics and the environment. Mr. Fasaro was an organizer of a series of tulks, workshops, and discussions of environmental issues at the association's joint meeting with the American Muthematical Society here this month.

Models of the Natural World

Mr. Fusuro says mathematicians can help envirunmental researchers by building models of the natural world and by seeking out buth the variables and the things that do not change, ur "invariants," in a living system.

Must importunt, he says, mathematicians can help environmental researchers by linding the internal structures that link many different phenomena. One differential equation, fur example, describes both the bouncing movements of a weight that is suspended from a mutress spring and the Continued on Page A10

Scholar Finds Cross-Dressing Is a Central Part of Human Culture

By SCOTT HELLER

Billy Tipton was a journeyman jazz musician who played the saxophone on the Weat Coast in the 1950's.

Married, with three adopted sons, he was found after his 1989 death to have actually been a woman. The funeral director who examined the body broke the news to his family. The atory was splashed aeross newspapers throughout the country.

The Tipton case came as little surprise to Marjorie Garber, professor of English at Harvard University, who argues in a book published this month that cross-dressing is central to our eulture, not the weird phenomenon that many may believe.

"Historians record dozens, probably hundreds, of such stories of ilfelong crossfreasers whose 'true' gender identities were disclosed only after death," she writes in Vested Interests: Cross-Dressie and Cultural Anxiety, published by Routledge.

In the 18th century, London gambling Continued on Following Page

Scholar Finds Cross-Dressing to Be a Central Part of Human Culture

Continued From Preceding Page parlors took bets on the real gender uf Chevalier d'Eon de Beaomont, an extravagant and mysterious French diplomut who dressed us o woman. English courts and the French king ruled that he was female. But an autopsy proved that he actually had male sex organs.

A Chinese Opera Singer

Two centuries later another French diplomat was tried for espionage after passing secrets to his lover, a Chinese opera singer who for 20 years he mistakenly helicyed was a woman. The case became the basis of David Henry Hwong's award-winning play M. Butterfly.

Trained as a Shakespearean scholar, Ms. Gurher was no stranger to the significance of crossdressing on stage, After all, hoy actors took women's roles during the Renaissance, a matter of increasing interest to current schulars of drama. And Shukesnearc's remarkably frequent use of seximi masquerude in such pluys as Twelfth Night and Two Gentlemen of l'erona hosn't gone unnoticed.

Contemporary popular culture, tuo, has been chock-full of genderbending entertainers, Kntharine Hepburn wears the pants as Sylvia Scarlett, while Dustin Hoffman teeters on heels in a red-sequined challenge established notions

gown os Tootsie. Mary Martin is the boy who refuses to grow up in Peter Pan. Heavy-metal rock stars ivear makeup and lace. Madonnie steps on stage in a double-breasted suit and a monocle. It's her male dancers who wear the oversized

Ms. Corber attended Madunna's "Blond Ambition" tour, part of the research for a hook that skips across historical periods and genres with wit and abundon. She also visited drag shows in New Orleans, studied medical texts on sexchange operations, and read makeup and hair-style manuals for transvestites ("Bouffant styles belong in the sixties," one guide warns).

As a literary critic with an interest in popular culture, Ms. Garber wants to "read" clothing and style. anuch as she would read a book or a play, "I'm not an anthropologist, I'm not a scholar of comparative religions," she says. "I'm trained to rend, and I wanted to read how people read themselves.

Her erucial conclusion: Culture is inextricubly linked to the figure of the transvestite. And the transvestite shows a great deal about gender roles and sexual identity.

Billy Tipton, a jezz musician shown at center in this mid-1950's photograph, was found eftar his death to have been a woman.

ory, psychoanalysis, and the Cultural Studies. emerging field of gay and lesbian

nbout gender itself, argues Ms. studies, Ms. Garber is director of Garber, drawing on feminist the- Harvard's Center for Literary and

Is he a he, or a she? "Transvestism destubilizes and disconcerts, Ms. Garber says, making room for other possible identities.

Ms. Gurber takes her argument further. The eross-dressed figure disrupts the idea of entegorization itself, she argues, and thus appears on the "horderline" of other disnuted entegories, such as race an

nationality, She cites Richard Wright's short story "Man of All Work," nublished in his book Eight Men. In the story, an out-of-work cook name Carl disgoises himself in his wife's cluthing to get a jub as a maid to white family.

"I've got on a dress and I look like a million black woman cooks, Carl tells his wife at one point. "Who looks that close at us co ored people anyhow? We all look alike to white people."

Inexpressible Sentiments

Cross-dressing often packs a po-Iltical punels, allowing Inexpress ible sentiments to be voiced indis guise, Ms. Garber snys. She points out that drive oueens were at the forefront of the Stonewall riots tha

ing of the mudern gay-rights movement. Dressing can become a way to redress inequality-"the translation of a mode of oppression and stigmntization into a supple medium for social cummenary and nesthetic power," she

The press release for her book makes it elear: Ms. Garber is not a transvestite. But she says she has long been interested in how elothing and identity are related, and has aways enjoyed clothing that blurs gender boundaries.

She remembers coveting a luisehall jacket as a high-school student in New York. "I didn't want to borrow one from n boyfriend," she recalls. "I wanted one of my own." Later, as a Yale University graduate student, her typical dress-jeans, a shirt, and a thick het-confounded a little girl on the uret, who asked whether she was a girl or a boy. "Girls don't wear telts," the child told her.

Blurred Gender Identitiea That clothing has different

meanings across cultures and bistory is a subject close to Vested Interests, which considers Muslim gab clerical vestments, and pirate ostumes, among other things. The book is part of a flurry of neudemic interest in blurred gender identiits. Scholars such ns Stephen Ored of Stanford University, Linirace Senetick of Tufts University, and Anne Herrmann and Martha Vicinus of the University of Michiga are at work on books whom

After to trying to comprehend more ty, Mr. McKelvey says, ul eards of computer runs simulating various combinations of many policy makers are already good and bad years, the model He points to the controversyon wed that a critical threshold exglobal warming: Policy maler. says, "are so frozen by their ists for the survival of the owl: When less than 20 per cent of the servative natures that if they do old-growth forest is saved the know what is going to happen, the es of the owl's survival drops

sharply.
Although many may argue about the model's assumptions or the precise location of the threshold. the knowledge of the threshold's existence is a valuable contribution, Mr. McKelvey says. Likewise, he says, the mathematical models can help biologists determine what data are needed to immove such predictions.

Pollutants in the Lungs

Sometimes mathematics is used to model aspects of the biological world that scientists would have difficulty studying in any other

At the Center for Mathematics and Computation in the Life Sciversity, mathematicians are trying mine what happens to pollitagis that enter the human line. The configuration of the lungs in other species is so different from humans' that luburatory animals cannot be used to study the health effects of pollution in humans, says Michael C. Reed, a professor of mathematics and director of the Dake center.

Because experimental surgery on humans is out of the question

"Environmental

mathematics is an attempt to get

mathematicians to

connect again with the

natural world."

Mr. Reed says mathematical modes are one of the few tools available to help scientists understand what doses of pollation different parts of the lung will receive when breathing different concentrations

To solve the problem, muthemutichns must first understand lung physiology. The sacs at the end of the long, Mr. Reed says, have an enormous surface area: 80 to 100 square meters, the largest area in the body that is exposed to the outside air. "This is an enormnus surface just sitting there and waiting to

be injured." Mr. Reed says.

The branches of the lung—tubular bronchioles—are protected by mucus that, in conjunction with the cells lining the lungs, sweeps many pollutants up and out of the lung. The mucus coat thins near the junctions of the lung's branches and is missing completely at the Junetions

Duke researchers have created two-dimensional models that can simulate portions of the human big, the thickness of the mueus lining, and the motion of the air and the pollutants that it carries into the og during breathing. The models hed the scientists discover hat the edges of the sacs, near the bronchioles, are likely to receive high concentrations of asbestos fihers when a person is breathing air containing them.

"The equations we are applying have been known for a hundred years, but the techniques of solving those equations are changing all the time," says Satish Anjilvel, a mathematician and an ass professor of medicine who is working an the lung models.

Understanding the deposition of pollutants in the lungs will keep many applied mathematicians busy essury idling of automobile enfor at least a decade, says Mr.

In the lower regions of the lungs, Mr. Anjilvel snys, the flow of air is cansidered to be "laminar" and can be described exactly by standard equations. But in the upper

regions of the lungs and in the don't overlap, there is no point on increasingly challenging one for nose, the flow is turbulent and cannnt be simulated exactly by existing equations, he says.

Ending Traffic Jams

At Rutgers University, Fred S. Roberts, a professor of mathematies, conducts research designed to reduce the pollution from automobiles by eliminating traffic snarls. Mr. Roberts uses muthematical tools known as interval graphs to time traffic lights to prevent unnec-

The interval graphs, originally developed in 1959 to deduce the shape of genes, represent overlupping lines in a figure as points on a graph. Euch point stands for an overlap: If two parallel segments

the graph for them

In applying the graphs to truffic mathematicians represent traffic flow that can occur simultaneously as points on the interval graphs. Truffic motion that cannot occur simultaneously, such as cars turning left and cars coming from the opposite direction, would not appear as points on the graph.

Mathematicians can search for the largest possible "elique," or cluster of points on an interval graph, to find how to move truffic efficiently.

The mathematical problem then expands to determine how to order the phases of green lights and how long each phase should be. As ad inecul lights and surrounding streets are added, the problem becomes an

Another problem on which Mr. Ruberts has wurked is the design of one-way street patterns. Many cities have adopted one-way streets to move truffic more quickly. But the patterns, which also use graph theory, must be designed without making it too difficult to drive from one place to the other. Trunsportstion officials might, for instance, ask mathematicians to arrange the pattern of one-way streets to make the longest trip that anyone has to take as short as possible.

Muthematicians do not have a way of computing the solution to fortunately, we come very quickly to the forefront of mathematical knowledge," snys Mr. Roberts. .

RESEARCH NOTES

- Study finds global warming could lead to growth of ice sheets
- Scientists say dyslexia may not be distinct neurological disorder
- Elective cosmetic surgery is said to be a form of submission

■ Astronomers obtain evidence that universe will expand forever

be lightly dismissed," the scienters write. The scientists also

Children with dyslexia may not have a distinct neurological disorder as is commonly thought, researchers say.

Many studies of dyslexin have referred to clinics because they have difficulty with reading. Scientists have criticized those studies for distorting the understanding of dyslexia.

To avoid that problem, researchers at Yale University and other Institutions studied a group of 414 children who were selected nt rundom from kindergarten classes throughout Connecticut

In the January 16 issue of the New England Joannal of Medicine, Sally E. Shaywitz, a professor of pedistries at Yale, and her colleagues report that they found a normal statistical distribution of reading abilities among the children, who were studied throughacarchers say that because no separate "hump" sppeared in the distribution curve, dyslexia is not a distinct disorder-just the bottom end on a continuum of read-

ing ability. Our findings indicate that dyslexia is not an all-or-none phenomenon but, like hypertension ond obesity, occurs in varying de such a choice. grees of severity," the research-

tists say. -OAVIO L. WHEELER found that more than two-thirds of the children who were classified as dyslexic in the first grade were not considered dyslexic in

Other researchers should be cautious, the article's authors ssy, before they make elaims that particular teaching methods have cured dyslexis, since many children improve without any inter--D.L.W.

Elective cosmetic aurgery is s form of colonization of women's bodies, says a professor of philosophy and women's studies at the University of Toronto.

In the United States today, the incidence of such surgical procedures as liposuction, breast augmentation, and various kinds of body "tucks" is on the rise, and between 60 and 70 per cent of such surgery is performed on women, Kathryn Pauly Morgan saya in the current (fsll) issue of Hypatla: A Journal of Feminist

From a certain perspective, Ms. Morgan says, a woman's deelsion to have elective cosmetic surgery can be seen as a voluntary assertion of independence, individuality, or transcendence over inherited limitations. But Ms. Morgan sigues that there are several paradoxes inherent in

While, on one hand, cosmette

surgery enald be used to creat and celebrate eccentricity or uniqueness, she argues, it is most often a move toward conformity. She notes surgeons' reports that many women specifically request noses or breasts like those of beautiful eclebrities. Ocensionally. Asisn women seek to have

their eyes rounded. In essence, Ms. Morgan nuintains, women who ehoose plastic surgery are attempting to conform to a culturally determined standard of attractiveness

Ms. Morgan argues that elective cosmetic surgery uctually signala dependence on the assess ment of others, who are, more often than not, bound up in the values of the dominant culture. Thus, what is often understood in terms of liberation is really a kind of submission or eolonization, she says. —ELLEN K. COUGHLIN

Using the Hubble Space Telescope, a team of astronomers has obtained evidence that auggesta that the universe will continue expanding for-

The results, presented at last week's meeting of the American Astronomical Society in Atlanta. shed new light on one of the most puzzling questions in cosmology: whether the universe will eventually stop expanding and begin to contract, or expand indefinitely. To determine which of the pos-

sibilities is the likely fate of th universe, Jeffrey Linsky, an a-tromuner at the Joint Institutefor Lahoratury Astrophysics at the University of Colorada at Bod der, and colleagues sought to e amine the ratio of deuterium, form of heavy hydrogen, to ord nary hydrogen in space. Astronomers helieve that slid

the deuterium that exists total was produced in the "big bang explosion that farmed the St verse. So by mensuring the ratio of denterium to hydrogen, scler tists can estimate the amount of ordinary mutter in the universe. That, in turn, can tell then whether the total mass of the cos mes is enough to allow gravity! slow the current expansion and force the universe to collapse at

Previous estimates of the min varied widely and were relatively imprecise. In their study, M Linksy and his enfleagues were able to improve on those estmates by determining the ratio within un accuracy of about 10

The scientists accomplished that by directing the Hubble Space Telescope toward Capella. the brightest star in the constellation Auriga. Using the star as a light source to illuminate the gas-cous clouds between it and Earth, they then measured the absorp tion of both hydrogen and deute rium in the starlight, giving then an indication of the relative abundunce of the two isotopes in the universe.

According to the team's analysis, the ratio of deuterium to by drogen in space is 15 parts deuterium to one million parts hydrogen, a figure that suggests that the universe has only about one tenth of the mass needed to even tually halt its current expansion

PRINCIPLES of SOUND RETIREMENT INVESTING

EVERYONE WILL GIVE YOU THEIR TWO CENTS WORTH, BUT WILL THAT BE ENOUGH TO RETIRE ON?

Today there seems to be an investment expert or a financial adviser just about everywhere you turn. But just how qualified are all these experts?

Peace of mind about your retirement comes from solid planning. From investments and services that are designed and managed with your needs and retirement security specifically in mind. The kind of investments and services TIAA-CREF has been providing for more than 70 years.

WE'LL HELP YOU GET WHAT YOU WANT OUT OF RETIREMENT.

Because our counselors are trained retirement professionals, they have only you and your future in mind. So you're treated as the unique person you are, with special needs and concerns about retirement. And that makes for an understanding. comfortable relationship.

HELPING YOU BUILD A REWARDING RETIREMENT.

With TIAA-CREF, you have plenty of choice and flexibility-from TIAA's traditional annuity, with its guarantees, to the investment opportunities available

Ensuring the future for those who shape it." through the variable annuity accounts of CREF. And because we're nonprofit, our expense charges are among the lowest in the insurance and mutual fund industries." So more of your money is where it should be: working for you.

Today, TIAA-CREF is the largest private pension system in the world-with over \$95 billion in assets, serving over one million participants nationwide.

TIAA-CREF: THE CHOICE THAT MAKES SENSE.

It's tough to wade through all the "advice" to find a reliable pension plan provider.

But as a member of the educational and research community, the best choice is simple: TIAA-CREF. Because when it comes to helping you save for your retirement, our annuities will add up to more than spare change.

Contrary to popular belief, it was not the end of the world when Kelly Hyson's Student loans were sold. It was just the beginning.

When Kelly's bank sold her student loans to Sallie Mae, she was just ending her college career and beginning her real career.

As is often the case at the beginning of someone's career; money was tight. She needed the repayment flexibility that comes with a student loan sale to Sallie Mae.

Because her bank sold her student loans to Sallie Mae, Kelly was able to take advantage of our SMART LOAN consolidation program. This allowed her to combine all her student loans into one and dramatically reduce her monthly payments for the first several years. So instead of having to choose

the job that paid the best in the short run, Kelly was able to pick the one that was best for her in the long run. And that's the best ending we could think of.

Personal & Professional

The Man Who Raised Tufts U.'s Profile Prepares to Become Its Chancellor

After 15 years as the university's president, Jean Mayer will become its chief fund raiser

By TULIE L. NICKLIN

MEDFORD, MASS. Jean Mayer luighs when he remembers his drive to Tufts University 15 years ago to interview for the president's job, "I promptly got lost," he says.

Getting around Combridge where he was a Harvard University professor posed no problem. But the eircuitous route to the eampus here did, "That's why there are all those signs for Tufts along the roadway now," he says,

Since becoming president in 1976, Mr. Mayer has done more than to put Tufts on the local map. Professors and administraturs, who describe him us charming, innovarive, und at times infuriatingly stubborn. credit him with transforming a sleepy New England liberal-arts enunous into a research university with some internationally recognized programs.

'A Strong Mind and Vision'

Throughout the transformation, Mr. Mayer has fought sporadic buttles with faculty members and students, but has emerged highly regarded. Yet that very admiration now causes concern on the campus. Some professors worry what will huppen when Mr. Mnycr resigns as president Iwo years hence to become Tuffs's first chancellor. Trustees are now working on u job description for the newly created position. The general idea is that the chancellor will focus on fund raising while the president deals with day-to-day operations.

"It worries me because it feels ton heavy for an institution of this size to have two people in control," says Elizabeth Animons, chair of the English Depart-

"Mayer has a strong mind and vision, and we would hope to get a president of strong mind and vision, It's hord to get two people with those qualities to see eye to cye," she says.

A World War II voteran, nutrition reseurcher, and U.S. Presidential advisor. Mr. Mayer came to Tufts with no experience as a college chief executive. When he took over, the college was having financial problems. Alumni support was virtually nil. The endowment was a ıncre \$30-mil-

AFTER CLASS

U. of Louisville's Jim Cartar, in mid-somersault: He describes the experience of selling through the eir 32 feet shove the ground as something between an amusement-park ride and a ballet

Triple Somersaults by the Daring Dean on the Flying Trapeze

By COURTNEY LEATHERMAN LOUISVILLE, KY.

The greatest acrobatic fent that most ecademic deans perform is balancing the needs of administrators and professors. A triple somersault is Jim Carter's specialty. He's an assistant dean at the University of Louisville and he flies on the trapeze.

Mr. Carter has been hanging out with circus performers and working on the trapeze since he was a kid. He even had a stint flying with a professional trapeze team. His wife, Liz Carler, got into the acl more recently: She eats fire, earning \$120

an hour gulping flames,
"I know this sounds weird," says Jenny L. Sawyer, the university's director of admissions for orientation. "But it doesn't

seem weird or odd at all, once you know him and see him."

With his gold wire-rimmed glesses, Mr. Carter looks more like the academician he's been for 3D years than the amateur trapeze artist he's been for even longer. He has Iried to use both talents, turning his hobby into a learning experience for sludents. Mr. Carter, who is in charge of undergraduate advising in the College of Arte and Sciences, even hopes to help students here start a collegiate circus program.

Partles for Undergraduatea

The trapeze, Mr. Carter says, has a wa of bringing down all defenses. He and his wife, who own a trapeze and six trampolines, have thrown a dozen parties for uni-

versity groups at their home outside Louis ville. It has become a summer tradition for a group of undergraduates, while training for fall orientation jobs, to picnic and practiee circus trieks in the Carters' backvard Ms. Sawyer ealls the outings "community team building." (Before Mr. Carter ar rived, she took students rappelling.)

Even the acting deen of the college Thomas J. Hynes, Jr., has tried the tra-

Mr. Carter describes the experience of sailing through the air 32 feet above the ground as something between an amusement-nark ride and a ballet. "The traneze has the same thrill as a roller coaster. Standing on the board, one hand on the bar Continued on Page A19

PRODUCTIVITY! WHIGHER EDUCATION

Productivity and Higher Education:

Strategies for Improving the Effectiveness of Faculty, Facilities. and Financial Resources

■ First presented at a Symposium on Productivity in Higher Education, ap by the Forum for College Financing

Productivity and Higher Education is edited by Joel Myersoo, a partner at Coopers & Lybrand, specializing in the financial management of higher education, and Richard Anderson, vice chancellor at Washington University.

Call 1-800-338-3282

Man Who Transformed Tufts U. Prepares to Become Chancellor

Continued From Preveding Page lion. And research was a low priority for faculty members.

Fifteen years later, Tufts boasts u new veterinary school, a sehool of nutrition, und a center for environmental management, and it runs a government-supported tesearch center on nutrition and aging. Tußs offers various programs around the world and its financial position is vastly improved. Nearly 40 per cent of the alumni who are solicited give annually. The en-slowment is about \$180-million.

No Knowledge of Fund Raising

Mr. Mayer snys he knew nothing about fond raising when he started. To educate himself, he advertised in newspapers for people to lill development positions. And for three months, he learned from those he interviewed

"Mayer's experience base was pretty hw," says Nelson S. Gifford, chairman of the Board of Trustees, "But he rose to the oceasion.

Mr. Muyer acknowledges that the changes at Tufts have been largely rooted in his own areas of rtise—the health fields—and that has caused some resentment. The son of two noted scientists,

Mr. Muyer was horn in Paris. He was decorated for his service with the French Resistance during World War II. When the war ended, he came to the United States. where he eurned a doctorate in physiological chemistry from Yale University. He went on to earn a physiology degree from the Soronne. In 1950, Harvard University hired him os an assistant professor of nutrition. The author of some 750 articles and several books, Mr. Mayer is noted for his research on human obesity.

In his 26 years at Horvard, Mr. Mayer served as nn adviser on nutrition issues to Presidents Nixon. Ford, and Carter, Today his projects for government and social opencies include work to fight world hunger, promote world peace, and protect civil rights.

Some of Mr. Mayer's critics are

professors in the arts and seiences who say they have watched dollars flow into new ventures but haven't seen significant increases in what they receive. Some say Tufts has strayed from its original mission as a liberal-arts college. Others believe Tufts has grown too rapidly. Some professors still resent the

veterinary school, which is in North Grufton, about 40 miles from the main campus here. Critics charge the school is a needless ex nense that takes money away from the other parts of the university. the school since its completion in 1979 has run up annual deficits of as much as \$3-million.

"A number of people in arts and sciences would suy gondbye to the yet school and to the drain it makes on but resources," suys the English department's Ms. Ammons who has been at Tufts for 16 years. "There is a feeling that some projects have gotten disproportionate

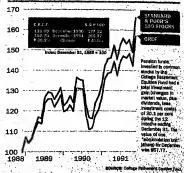

Says Steven P. Marrone, asso eiate professor of history: "The arts and sciences do sometime feel like a stepchild of the universi-

Some Decisions Criticized

Over the years, students have also criticized some of Mr. Mnyer's decisions. In 1989 they protested a new policy that forbade meist, sexist, or otherwise offensive speech in classrooms and dormitories. Mr. Mayer reseinded it.

In the 1980's, students niso prosested the fact that Tufts had not opposed opartheid by fully divesting its holdings in compunies that did business in South Africa Mr. Mayer maintained that a better approach was to divest holdings in certain companies and to support scholarship progroms for South African students. By the late 80's. Tufts had fully divested. But some students have now yowed to fight Mr. Mayer's new position that campuses should reverse their divestment policies to help rebuild into a site for students studying the economy of South Africa (The Chronicle, December 18, 1991).

have-and that we do-is the work

create new areas of study to attract new sources of income hefure it could put money into existing programs in the underenniunte urts nnd selences.

In addition to creating new graduate schools, Mr. Muyer punincil new money into the l'letcher School of Law und Diplomney. which already had a good reputation for its training of students in international relations. He converted an old monastery in Talloires, France-a gift to Tuftsabroad and a center for university conferences. Programs were sel up and strengthened in England, France, Germany, and Spain. Since 1988 Tufts has linked some classes by satellite with those in Moscow so students can discuss current issues.

Globalization

"He saw that Tufts had u great potential to be an international university, and segment O. Roth, a lawyer who was graduated from Tufts with a bachelor of arts modern languages who has taught at Tufts for 39 years.

The globalization of the universi-

ty, ns Tufts officials call it, includes attracting a more diverse group of students. Tufts enrolls about 4,500 undergraduates and 2,500 graduate students. The number of foreign citizens enrolled as undergraduates has doubled since 1986, About 10 per cent of this year's freshmen were cilizens or residents of for-

eign countries Such changes in academic programs and the student population mean that Tufts doesn't feel as far away from the Ivy League institu-

Mr. Mayer says that despite some tions as it has in the past, campus Mayer has followed his owner "It's awfully burd to shine in fessors say. He'll have an idea! their shadow, and the fact that we ten to others. And then usually

'He 11od All of These ideas'

"Jean Mayer scared the hello also saw Tufts changing, Mr. Bok of us when he first came her he retired in 1990 after 19 years as cause he had all of these ites; says Mary Ella Peinleib, dand liberal arts

Thomas W. Murnane, sta vice-president of the university, calls how Mr. Mayer proved as wrong with his first capital or namen. In the late 70's a consult linn hand told Tufts officials the could expect to raise \$14-million live or six years. Mr. Mayerden ed the amount wasn't enough 1974, he colded a zem to the gal making it \$14tt-million. By 19 l'ntis had mised \$145-million

Tutts is now nearing the cald \$250 million compaign Began 1987, the campaign has nist about \$210 million.

Despite the fact that Talis he rassed nearly \$400-million in life more than a decade, the app growth of the 80's has cought with it. "All universities are sto gling a little bit. And Tulks is at immone to what has befallen high education," says Steven S. Ib nos, executive vice-president at treasurer. Tofts is making some

nor cuthacks, he says. After 15 years of grandischange, Mr. Mayer looks formal to stepping down as problem and up as chancellor. Such a rangements are regarded as units al in academe, but not as unnoted hle

Mr. Mayer and the Board of Trustees both want to ease the concorns of those here who less list isn't large enough for two leaders Mr. Mayer says his new resons hillies are pretty clear. He wi work on development projects i the Buston area to generate revenue for Tufts. He has alread dents had chips on their shoulders started working with the publicate because they were not accepted to private sectors on a \$1-billion phar nacentical park. And he less the rendy approached American Japanese companies that might interested in the second projet

hiotechnology perk. "I'll have nothing or very & tie—to do with the running of the core of the university," he spe former president of the Student Senate, says he chose Tufts over "If there's one thing you don't want—and my successor should be the University of Rochester bewant—it is my breathing down is neck and judging what he is to During his presidency, Mr. ing."

The rigging goes up in March and ters became friends with professignal trapeze artists

After high school, Mr. Carter was tempted by offers to work as a uct. A bulky man, he would have spent most of his time hanging up-side down, knees hooked over a bar, catching fliers. The real glory goes to fliers, but Mr. Carter reenlls being thrilled by the chunce to perform.

His mother was less enthusiasbachelor's degree in mathematics Mr. Carter moved up the adminis-

illing student orientation, advising, and putting his hobby aside. In 1982 he took a similar post at Illinois State University. There, he resumed his work on the Impeze.

'The Flying Corderos'

Bloomington, III., a few blocks south of the campus at Normal, was a popular winter training spot for trapeze artists early in the century. A few circus families still live there and perform at summer festivals, which is how Mr. Carter hooked up with a local act. "The Flying Corderos." Illinois State niso has the oldest and largest collegiate circus society in the country. Gamma Phi.

Mr. Carter says he'd like to help students at Louisville start u simi-

tecred her talents for the university's homecoming festivities, has already taught students to cat fire. Fire eating, Mr. Carter divulges, is part trick, part talent: The swallower uses a cool-borning firel, angles the torch so the flume burns away from the month, and exhales while clamping down with one's inws on the flame.t

Mr. Carter still keeps in touch with his circus friends, tRingling Brothers winters at the Louisville fuirgrounds.) He hasn't performed for a while, but still works out oo the trapeze.

Meanwhile, he is teaching an introductory philosophy course this semester-the first class he's taught in six years. "I feel as though this is something during for me," he says.

Performance Class By Itself

If you're looking for a way to make the most of your retirement savings and that of your plan participants, consider performance.

A lot of providers of 403(b)(7) retirement plan services claim it. But few can prove it. Fidelity's assets have grown from \$14.9 billion in 1981 to more than \$135 billion* today.

But performance should extend into other areas as well. It's just as important to find a turnkey solution that gets high marks from you and your employees. That's why we place such emphasis on participant recordkeeping and employee communications support as well as choice and flexibility.

To find out more about Fidelity's first class performance and how it can help you, contact our Retirement Services Group at 1-800-343-0860.

nation about Fidelity mutual funds, including fees and expen mber 30, 1991. For more ses, call for free prospectuses. Read them carefully before you breest or send money.

■ Seminary to offer courses in Yiddish language and literature

■ Textiles college blends liberal arts and professional courses

For the first time in its 102- that meant Hebrew, Aramaic, year history, New Mexico State
University has a general-educauniversity has a general-educanary will offer courage in Yidtion requirement for all under-

Students must take two writing courses as well as courses that meet requirements in critical thinking, social analysis, and "human thought and behavior," Every student will take a fine-orts or literature course, and a historical survey of Western civilization.

The program puts uniform reschoola of orts and sciences, engineering, business, agriculture, education, and human and community services. "Until now, there was tremendnus inconsistency and no real plan " said Thomas Hoekscmn, professor of English and a meinber of the planning committee for the new curriculum.

The university requires students to take two upper-division courses in two schools other than the one that houses their major. Mr. Hoeksema said the hope was that students would make connections across disciplines and he exposed tu muiticultural and international perapectives. A universitywide committee approves which courses satisfy that part of the requirement called "Viewing a Wider World." Among those approved so far are 'Agriculture in an Heban World ' from the agriculture school, and "Comparative Economic Systems," from the business school.

"Visual literacy" is the goal of a Vassar College program that sima to put the atudy of film in an interdiaclplinary

The Luco Program on Cinema, Literacy, and Culture is introducing both students and faculty members to current developments in the study of film, television, and other different quest scholar will come to Vassar to teach undergraduatea and direct faculty seminars. For example, an American tory course will highlight architec ture and the role of working wonen, said Murion W. Roydhouse, the program director and an associate professor of history. Instead of taking an introduction to social ogy nr economics, students might study the impact of technology is the modern world.

The coilege has also added re quirements in area studies, "inter cultural understanding," and aesthetic appreciation. New majors include biology, product and brand management, and international -SCOTT HELLE

How To Make Your Dorms The Most Popular Learning Center On Campus.

Today's college bound students are growing up in a quickly evolving world of electronic information access. GTE Applied Campus Technologies brings this voice, data and video capability into the dorm room through our unique multifunction port. It is totally adaptable to virtually any PC, as well as providing telephone and cable TV services.

Thus, through turn-key installation of a vendor-independent infrastructure, your entire campus can be networked to provide a vast selection of cable TV channels, worldwide information access, video-on-demand, E-mail, and other services custom tailored to your needs.

Want to learn more? Simply call for our free Smart Campus brochure today.

Please visit us at the GTE booth during ACUTA, 7/7/91-7/11/91, and in Vencouver during ACUHO, 7/14/91-7/18/91.

On Line

The obstacle to integrating information technology into the college curriculum is not the technology itself. It is people. according to Marn Mnye of the Annenberg/CPa Project.

"Technology requires a different way of thinking about the tearning process," Ms. Mnyor said at the annual meeting of the Association of American Colleges in Washington this month "We have to get faculty to see that it is worth their time."

Ms. Mayor said professors should understand that it is att right to admit that they are ignorant about computer technology (everyone else is, toot and ask questions. "Once you get them hooked, faculty members come along and technology works." she

When the University of Michigan distributed copies of a Michigan distributed copies of a new policy on the proper fixe of ioformation technology, it storted a "Think About It" campaign so the documents wouldn't Innguish on bookshelves.

Virginia E. Rezmierski, assistant for policy studies to the vice-provost for information technology, who managed the campaign, called for 50 faculty volunteers to train us leaders of conversations on ethical and unethical practices involving computers, software, and electronic networks. The volunteers primarily philosupliers, ethicists, and lawyers—led two-tn-three-hour discussions around the campus.

"Our goal was to charify values, to let people suirt to see how somebody else thinks, what the different points of view are that exist on the campus," snys Ms.
Rezmierski, "It was not our job to get them to buy the university colicy-just to get them sharing

points of view."

Ms. Rezmierski estimates that the campaign, which is taking a break right now, reached about 7tht people directly and many hundreds are by word of month. She says the group leaders liked their job so much that they are ready to do it again at any time.

The Online Computer Library Center has completed the installation of its new \$70million telecommunications network. The network, which took 14 months to complete, now serves nearly 14,000 libraries in 46

The occc's original network was a dedicated, leased telephone line with all its circuits connected to the center's headquarters in Dublin, Ohio. The new telecommunication network, with more than 280,000 miles of line, is a packet-switchin net with 45 nodes in 45 different cities. The six major nodes are connected with each other and with

Traffic on the new network in averaging about 3 mittion messages day," says George Carpenter. director of the Network and Hardware Services Division.

Information Technology

Research Libraries Group Seeks New Focus and New Members

Major shift for organization once widely seen as elitist

By DAVID L. WILSON

Nearly 17 years after it was faunded, the Research Libraries Group is reinventing itself, embracing organizations beyond the major research institutions that have made up the bulk of ita membership and preparing for further changes in the library com-munity that are driven by the informationtechnology revolution.

While the RLO's fundamental mission remains one of assisting research and scholarship, the group hopes to cast a wider net for its members, which now number 112. Its president, James Michalko, says alo will continue its emphasis on collective efforts to solve the problems facing researchers, but those efforts will take place with a have a scholarly clientele.

"That includes the archival community. the museum community, independent resenreli libraries, and learned societies," he says. "The big, productive societies for the future nren't going to be the ones that ure determined by institution type," says Mr. Michalko. "They're going to be driven by finding out who's got the same problem and the same mission, regardless of institu-

"We're trying to create a whale different set of ulliances," in adds. "Not abandon the library and the library alliances, but hring these other constituencies into the

4 Broad Thenics

The shift marks a dramatic change at RI.G. Silys Mr. Michniko. Founded in 1975, RI.O hus tried to improve access to information needed in education and scholarship. Its original vision could be viewed by outsiders as elitist, Mr. Michalko admits. "The founders genuinely believed that there was a set of institutions that shared unique problems," he says. "As soon as you start to define the group in that fashion, you end up with that elitist baggage. I think what's changed here is that folka recognized that there's an enormous range of contributions to the challenge of supporting scholarship, and that lots of different kinds of institutions make contributions to

Mr. Michalko says RLo will concentrate on four broad themes in the coming decade: creating alliances that go beyond the comprehensive research library; dealing with collections and information delivery; protecting materials, such as microfilm and electronic media, designed to preserve printed documents; end assisting in the development of computer systems to use in research on the local level.

"Our mission remains one of Improving access to an extended range of research resources," Mr. Michalko says. "Whet we've done is refocus the agenda: what can we do most productively to make good on the mission.

Mr. Michaiko is spending a great deal of his time on the road these days, trying to

Records of 10 Spanish noble families put on optical dieks

■ Prototype electronic network set up for percuesionists

■ University hospital substitutes computers for patient charts

Magnetic cards offer 24-hour access to computer laboratories

■ Videodlak Images of ekeletons used to teach anatomy

■ Distance-education center offers free electronic eervices

Researchers at the University of Florida are computerizin the records of 10 Spanish noble families so the documents will

be avsilable to scholars. Michael Gannon, director of the Institute for Early Contact Period Studies, is overseeing the effort to copy onto optical disks millions of pages of historical documents, dating back hundreds of years. Researchers will be able to use the disks with pluyers attached to deckton computers to search for specific documents.

The project uses scanning devices that can convidocoments and pictures in varying shades of gray. With this gray-scale technology, "we can increase the contrast between paper and faded ink, remove water stains, and redoce bleedthrough," says Mr. Gannon. "It gives you control uver munuscripts that we never had using micro-

Mr. Gannon says it takes, on uverage, less than 30 seconds to copy each page. Even so, "this project will last for at least a dec-The Spanish records are a treas-

A music professor at Del Mar College in Texas has estab-lished a prototype electronic network for percussionista around the world.

The prototype, called the World Percussion Network, has been operating 24 hoors a day, seven days 8 week, since April, according to Norman Weinberg, an associate professor of percussion, who is developing the electronic bulletin board with the Percussive Arts Society. "In the initial stage, we have 20 sub-boards for special-interest groups and 20 different file arens. About 50 people log on regularly,"

When the network is operating fully—the target date is November 1992—it will be a source for articles id research papers on percussion, files of digitized sounds, announcements about recitnis and tours, and sore, says Mr. Weinberg, who is elso the principal timpanist pus Christi Symphony Orchestra. Eventually, we'd like to catalog

all music hy composers from with a telephone number to call for around the world," he says. "The best way to describe it is a Library The system paid for itself within of Congress for percussion.

The University of Michigan's College of Engineering is using a curd-entry system that gives tudents 24-hour access seven days a week to its computer laboratories.

The system functions a lot like an automatic-teller machine. Students slip their campus identifica-tion eards, which have magnetic strips, into scaoning machines that open doors to authorized people. If the scanner danies access, the rea son appears on the screen, along skeletons and fiber-glass casts of human and primate skeletons, and a small sample of human Jossil casts, says John E. Blank, a professor of anthropology, who is developing the disk with a colleague. He says the videodisk, which will have 462 human, 47 primate, and 387 fossil specimens, will simulate a well-equipped skeletul laboratory.

Mr. Blank is using images from the collections of the Cleveland Museum of Natural History, the National Museum of Natural History, the National Medical Museum, and the Smithsonian Institu-

Historiano and political scientists have complained in recent years about how difficult it is for them to review remment documents relating o controversies in recent American history.

ments last week indicate that federal policies may be changed to open up more records about the Central Intelligence Agency and the assussination of President John F. Kennedy.

At the CtA, Director Robert M.
Gates is considering u plan to release many more documents than have been available to researchers in the past. The plan was developed by a special "Task Force on Openness" that he appointed to find ways to inform the public about the agency's

Mork Mansfield, a spokesnun for the cia. said: "We're going to try to be as forthcoming and candid us we can, consistent with our mission and the protection of our sources and

The Kennedy documents in the news last week were thousands of pages of materials gathered by u special committee of the House of Representatives for a 1978 investigation of the assussinations of President Kennedy and the Rev. Martin Luther King, Jr. At the conclusion of the investigation, the documents were scaled until 2029.

But maid the controversy over the new movie JFK, a key member of Congress—in a reversal—said he would consider supporting a Thouse resolution authorizing release of the materials. Rep. Louis Stokes, an Ohio Democrat who was chairman of the House committee that conducted the 1978 jovestigation, said he would support such a resolution, the nuly means by which the papers can be released.

Historians praised the latest developments on both the
Keonedy and CLA papers.
Kevin Walsh, legislative director
to the Association for the Advancement of Historical Research, said the Kennedy important part of our history, and it's important to have the records

opened to write our history." Page Pulnam Miller, director of the National Coordinating Committee for the Promotion of History, said that scholars would be litilled with any change in the CIA's policy on releasing records because "so little has been available up to

Ms. Miller added that policy makers had paid too much attention to the risks of releasing sensitive records, and not given enough thought to the consequences of ling records "on people": stilludes toward government and

She said the distrust of many Americans for their government and the skepticism of many about the official investigation of President Kennedy's assassination were "the result of our government's secrecy

With Their Eligibility for Student-Aid Funds at Stake, Many Colleges Claim U.S. Data on Defaults Are Faulty

By THOMAS J. DeLOUGHRY

WASHINGTON

Six mouths after the Education Department announced a plan to end the flow of student loans to justitutions with high default rates, many of the near-profit colleges and technical schools that would be affected sny they have evidence that the department is using faulty figures.

Last July the government identified 178 colleges and for-profit trade schools that were in danger of losing their eligibility for the lum programs because their former similants had had default mics in excess of

35 per cent for three consecutive years. Department officials report that they have succeeded in stopping loans to 117 of the trade schools and to 9 non-profit col-

leges and technical schools. Eleven nonprofit colleges and 31 trade schools are still appealing their cases while 10 trade schools have won the right to continue in the programs.

Cutoff Rale to Drop to 30% Institutions on the department's list are in danger of losing eligibility for Stufford

Student Loans, Supplemental Louns for Students, and Parent Loans for Undergraduate Students. Congress required in a 1990 budget-re-

duction law that the department stop loans to institutions whose former students have high default rates. The cutoff rate will drop to 30 per cent in 1993. Historically black institutions and colleges controlled by In

dian tribes must comply with the law by

Officials at seven Culifornia community colleges that are among the non-profits with appeals pending are optimistic they will avoid losing loan cligibility beenuse the state agency that gourantees many of their loans has found errors in the culculu-

tion of default rates. Linda Michalowski, coordinator of student financial assistance for the Culifornia Community Colleges system, said the crrurs had resulted from miscalculations of when students were due to begin repaying their lonns. The default rate is calculated by dividing the number of defaults that oc-

Small Colleges May Face Big Problems Over Animal-Welfare Ruling

By STEPHEN BURD

Researchers suy small colleges are likely to face the biggest burdens as a result of a federal-court ruling that extends an animal-welfare law to rats, mice, and birds. Research universities generally have

systems in place to meet the requirements of the law for all the animals they keep, scientists say. Animal-rights activists. however, say that the ruling will force both large and small institutions to provide better care for animals.

The ruling involves the Animal Welfare Act, which Congress passed in 1971. In setting the original regulations to carry out the legislation, the Agriculture Department excluded rats, mice, and birds, conlending that Congress had allowed the department to determine the meaning of the

OPINION

The Triais of Reforming Legal Education

By James D. Gordon, III

HE LAW-SCHOOL CURRICULUM has not changed much since the 1870's. That's when Christopher Columbus landell dean of the Harvard Law School, decided that, with a name like his, he desperntely needed to discover something before he died. So he discovered the Socratic method, a martial art that uses questions and unswers to teach the law.

Students immediately hated the Socratic method with a passion. Langdell's teachine sivle was so unpopular that Harvard's kiw-school enrollment plummeted, and rumors circulated that he might be fired. However, when law professors across the country learned how much students despised the method, they quickly rushed to adopt it, and Langdell's job was spared.

Nothing changed for a hundred years. Lawyers may not know much about educa-tion, but they know a lot about precedent. Jonathan Swift observed that precedent is important because, in the law, unything that has been done before may legally be done ugain. So the Socratic method has continued Its reign unto the present day.

The Soemile method is good for teaching students how to "think like a lawyer." However, because it's su slow, it's not much good for teaching unything else-except to touch students to linte the sound of their name being called by the Instructor. Legal education bused on the Socratic method emphasizes legal-reasoning skills rather than specific oreas of the law. This generalist approach, of course, has deficiencies.

For example, in recent years law practice has become increasingly complex and specialized. In the old days, most lawyers were sole practitioners after they left law school. A lawyer with a formbook and a Dictaphone was an instant expert in anything. Nowadnys things are different, and students equipped primarily with legal-reosoning skills aren't always prepared for what law practice actually entails. Many will find their way to the megafirms, each with a huge flock ttechnically, a "pride") of lawyers. Each lawyer focuses on one narrow subspecialty—for example, how to convert backyard birdhouses into timeshare resort condominiums.

There is also much more law than there used to be. The New Deal, for example, helped to bring about the rise of the regulatory state. In the old days you could clear a wilderness, settle a territory, and declare a war without ever thinking about lawyers. Today you have to consult a lawyer before you hose out the grease pan in your garage. Preferably a grease-pan specialist.

In addition, some of the cases that law students focus on are out of date. Students read hoary medieval cases in which Sir Ga-wain attacked Baron Relic. Studying anclent swordlights may be interesting, but i

time being wined and dined by prospective employers, Also, there is some satisfection in being an upper-class student and lording It over first-year students. However, by the time students are in their third year. they are bored out of their minds. A particular difficulty with the upper-

level curriculum is that, basically, there is no upper-level curriculum-merely a smorgasbord of unrelated courses. Students experiencing mental indigestion from combining the enchiladas of environmental law with the fishsticks of federal taxation are desperately reaching for the aniacid of reform. To coin a obrase.

leaves students unprepared to deal with

the modern world of electronic fund trans-

fors and licensing agreements for computer

Students, in fact, can learn the basic an-olytical skills in their first year. They en-

dure the second year poticntly enough,

mostly because they are having a delightful

Consequently, law schools recently have begun talking about curriculum reform. Of course, any lawyer cnn talk. Lawyers earn their bread that way. The aston-ishing thing is that a few law schools are actually doing something.

NE CURRICULUM REFORM IS to provide more training in skills besides legal reasoning, including drafting documents and trying cases. Some schools have adopted this reform because employers have complained, with mosquito-like persistence, that new law graduates can't find the courthouse door, even when they are dropped off on the front steps.

However, law professors don't particularly like to teach lawyering skills. If professors had enjoyed the practical aspects of lawyering, they wouldn't have given up a salary of a Jillion dollars a year in law practice for the privilege of driving a rusted-out Ford Pinto. Being forced to teach those things without earning a lawyer's salary is the worst of all possible worlds.

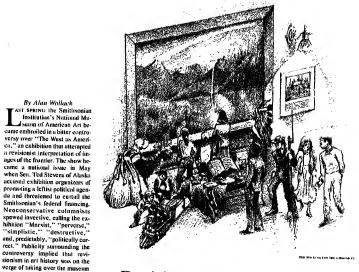

The other major curriculum reform being tried is specialization. Rather than take a lot of survey courses in areas that they are not interested in, students can concentrate in a particular area of the law, much like having an undergraduate major. Some schools are beginning to offer specialties in such legal fields as the environment, intellectual property, health care, and international law. Students receive certificates stating that they've specialized in a particular area, which can help set them apart when they look for jobs. It also pleases clients who, oddly enough, don't like paying for a new lawver's oo-the-job training.

Some law professors object, however, because reforming the curriculum is a lot of work. "We only finished reforming the curriculum 100 years ago," they complain

Revisionism Has Transformed Art History, but Not Museums

very few attempts in recent years to mount an exhibition along revisionist lines. Despite the prestige that revisionist art history now enjoys in colleges and universities, museums for the most part have done everything in their power to ignore it.

Unfortunately, this is hardly

the case, Indeed, "The West as

America" represented one of the

By Alan Wollach

"Revisionist" or "new" art history grew out of the crises of the 1960's when young scholars-many of whom were taking part in the civil-rights, anti-war and women's-liberation movements-critleized the discipline's narrow focus on problems of connoisseurship and artistic "influence." These scholars began to search for new ways to understand the relation between art and its historical, political, and social contexts.

At first much of the new art history tended to be Marxist or feminist-or, frequently, a combination of the two. In a field that prided itself on upholding standards of "eivilization," the "new" art history seemed rough-edged and argumentative. It engaged in confrontational politics, took issue with built-in assumptions and biases. and exposed pervasive sexism and elitism. It also called for increased attention to theories underlying the practice of art history and for the recovery of the discipline's intellectual heritage—the focus on historical and philosophical problems that had made the field central to the humanities in the early decades of the century.

I do not exaggerate when I say that "new" art history was responsible for the discipline's revitalization. Revisionist art historiuns insisted on discussion and debate in place of the usual numbing silence. Their probing and questioning opened the field to new areas of inquiry and to new theoretical perapectives.

Today revisionism generally dominates academic art history. Lending graduate

feminists, and semioticians. Theory has become a crucial part of the curriculum even at such strongholds af tradition as Columbia and New York Universities, Aunual meetings of the College Art Association routinely feature sessions an such sub-

programs vie for the services of Marxists,

jects as the construction of gender, the politics of representation, and the social history of art.

Thus revisionism has transfarmed acndemic art history; yet its impact on museum exhibitians has remained slight.

In 1987, the Metropolitan Museum af Art put on a blockbuster exhibition, American Paradise: The World of the Hudson River School Painters." The first Inrge-seale retrospective since 1945 af Hudson River School landscapes, the exhibition brought together 88 works and fealured rooms devoted to canvases by Thomas Cole, Frederic B. Church, and Asher B. Durand.

PEW MONTHS LATER, the Hudson River Museum of Westchester (N.Y.)—an institution little known outside its immediate area and generally ignored by New York reviewers-slaged its own Hudson River School exhibition, "The Catskills." Organized by Kenneth Me yera, a young American-studies professor at Middlebury College, "The Catsbrought together more than 150 abjects-landscape, genre and portrait paintings, prints, drawings, photographs, maps, postcards, books, china, railway time tables, hotel bills, and other artifacts relating to 19th-century Catskill tourism.

The Hudson River School is my particu-Inr area of specialization, and I visited the two exhibitions repealedly. The contrast between them-one representative of old. traditional art history, the other of the new"-could not have been more telling.

"American Paradise" was all glassy spectacle. The spacious galleries, the brilliunt lighting, and the lish setting combined to produce un experience in which visitors were overwhelmed by the beauty and power of the paintings. Yet something was missing. By viewing the lundscapes of the Hudson River School as so many timeless musterpieces, viewers gained no sense of the paintings' history or their historical role. Patronage, contemporary response to the works, the art market, tourism, religious beliefs, industrialization, Jacksoniun politics, Manifest Destiny, slavery, the Civil War-all these topics were lurgely absent from, or ruther were absorbed by, the exhibition's pseudo-historical theme. Instead, the show promised visitors gleaming visions of a conflict-free American past, a "return to Paradise," in the words of the advertisement put out by the Chrys-

ler Carporation, the exhibition's sponsor. "American Paradise" exemplified traditional art historical wisdom: Choose the best works, gather them together under a familiar if tendentious label (Treasures. Masterpieces, Genius, Paradise), add wall texts with a smaltering of background information, and, volld, success is pretty much assured. But what if you depart from farmula? What if you seriously want to explore relations between art and its historical context? That was the problem the

Hudson River Museum set for itself. The exhibition was laid out in the museum's large central gallery. Paintings hung on lemporary walls facing eases with books, prints, and other artifacts related to lie painlings. Wall lexts set forth basic

roughly chronological path. Atk must every step, one escor tered fuscinating jaxtapositions-fur example, stereozo images of the Catskill Mountain House, a rendering of it on Salfurdshire china, Frederic Church's painting of the visfrom the Mountain House, and so forth. There was nothing found ar self-consciously didacticales the installation. Nor did the areence of objects in different media—traditionally a contoil tabou -- detract from the eigh ment of individual artifacts. Still, as you worked your va

premises. Visitors followed

through the exhibition, you be came increasingly aware of his the materials un display deixe from, and also helped to com titte, a touristic culture. See this field, landscapes by Cé Church, Durand, and others b gan to make greater historical artistic sense. No longer refi masterpieces, objects of a dism hodged aesthetic contembis they could be seen in relationts

raige of 19th century cultural protice such as tomism, mature warship, and pair otic beliefs that equated American sale with American identity.

"The Catskills" demonstrated one va in which nursennes can break out of ite masterpiece-treasure-genius-paralisess drome. There are others. An exhibitori 1988 at New York's Center for Africat African called "Art/Artifact" subjected the cargury "art" to a searching examination recreating the different exhibition forms in which African works have been seen't the United States since the late 19th cents ry. They included a "curiosity room"? natural-history display complete with & urama; an "almospherie" big-musea type of installation; and a stark confe rary gallery. The center even included "authentic" period labels.

Another example was the Menil Collection's "Winslow Homer's Images Illucks" in 1988. Visitors encount variety of works-oil paintings, watered ors, lithographs, wood engravings from Harper's-that allowed them to explore h detail the artist's complex response to the ehunging situation of blacks during the Civil War and Reconstruction.

THESE EXHIBITIONS PROV heuted controversies, no blowns over "Murxism" or "political car rectness." Still, these and similar path breaking shows usually turn up in s institutions, sites beneath the notice of the national news media. As a consequ they reach audiences limited to local mis um patrons, students in the area, and a historiuns in the know.

Why don't lurger, national institution like the Metropolitan, the Museum

Modern Art, and the National Gallery mount similar exhibitions? Why have they gracially failed to take advantage of the large body of revisionist scholarship new available? Why are they so irrevocably atached to their formulaic blockbusters and reasure-house displays?

The usual response from such institutions- We give the public what it wants"—begs the question. Indeed, it ahdicates responsibility, since museums are apposed to be in the business of shaping. not reflecting, tuste. A stendy diet of commodified culture can only dull the public's entical capacities. Or is that really the point in an age in which trustees from a kading museum travel to Disney World to study ways of improving exhibition tech-

"Revisionist ideas about patronage dass, or gender aren't ideus fur exhibisons" is another frequent objection. On the contrary, exhibitions can tell complex stories spatially. A successful exhibition is not a book-on-the-wall, a narrative with objects as illustrations, but a carefully ordestrated deployment of objects, images, and texts that gives viewers opportunities to look, to reflect, and to work out meanings. Revisionists know this quite as well as traditionalists, us the three exhibitions cited demonstrate. What this objection suphyboils down to is a fear that revision. ists will neglect or ignore art's aesthetic dimension. This feur makes sense only if you believe that the aesthetic is destroyed by the presence of anything else (historical atifacts, works of art in different media. n about patronaget.

BELIEVE that the real reason for museums' reluctance to draw upon revisionist scholarship is their deep-seated fear of controversy and critical thought. Museums like the National Cinflery thrive on the notoriety that comes with cheap stants such as the exhibition of Andrew Wyeth's prurient "Helga Pictures." Liennme controversy is sumething else entirely: It mises basic questions, invulves people in issues, makes them care passionutely about ideas. In a succeey in which enflure dimately is controlled by corporate clites. controversy is ton dangerous-it cuts too dose to the nerve.

I am aware, of course, that museums aways have been deeply conservative insitutions. Dependent upon corporations. government agencies, and wealthy ilonors, ad presided over by well-heeled trustees y more interested in prestige and the fate of their personal art collections than the public good, they have every reason to reid anything that would bring down the wath of their financial backers. This built-in conservatism has been rein-

forced in the last few years by the appearance of dour, neoconservative critics who have taken upon themselves the task of isulating the public from radical or even mildly dissenting views. Their wild-eyed assault on "The West as America" -whatever the exhibition's flaws, its historical premise was hardly novel-will no doubt inspire even greater caution on the part of curators and museum directors.

Thus, prospects for revisionist exhibions are not especially bright. Still, this should not be cause for despair: Revisionamishere to slay. And this means that its Peter will continue to haunt museum car-

MÉLANGE

Students and the Movement for Civil Rights; Lessons From the Life

The life of Celia, a slave, presents us with a detailed case study of what the historian Charles Sellers referred to us "the fundamental maral anxiety" that slavery produced. This fundamental moral anxiety, and the moral dilemmas that produced it, were at the very heart of the institution of slavery. Until recently they have received little attention from historians, who concentrated instead upan the economic and social aspects of slavery, and upon the pulitical issues it created. . .

The life of Celia demonstrates how slavery placed individuals, black and white, in specific situations that forced them to make and to act upon personal decisions of a fundamentally moral na-

Celiu's stary derives much of its significance, as well as its narrative power, from the nature of the specific issues and moral dilemmas it forced individuals to confront. Her case starkly reveals the relationships of race, pender, and power in the antebellum South, in addition to illustrating the manner in which the law was employed to assuage the moral anxiety slavery produced. Finally, because race and gender are issues with which our society continues to grapple. . . . the case of Celin, a slave. reminds us that the personal and the political are never totally separate enti--Melton A. One approach is to pretend that County, Missouri, On October 9, 1855, Celia entered the circuit court of the two are finally unrelated, that distin-

dand above evil ideas and practices. To accept such a view is to deny and sanitize what in most instances the artist does not deny. Radical misinterpretation follows. A second approach, reflected in the Israeli aversion to performances of Wagner, is to proscribe offending works, a policy followed by

Israel in the occupied territories and hy

most Islamic countries toward Salman

Rushdie and other dissenters. This, too, is denial and political censorship. But the reality is that connections between barbarism and culture are common. If one is to care about art and humanity sincerely, there must never be banuing of books or ideas. The real task is how, not whether, to read them, to try to see them whole, to appreciate

that art and judge the morality together, as actualities of human history. -Edward Said, professor of English, Columbia University, in the January 12 edition of The New York Times

Star Search

North Harris Montgomery Community College District is now accepting applications to fill anticipated new faculty positions. This is a unique opportunity for outstanding instructional leaders to continue their professional development and gain further recognition for their scholarship and teaching skills while working with NHMCCD's exceptional team of innovative faculty stars and administrative leaders.

NHMCCD comprises three colleges (North Harris, Kingwood and Tombali) located in a 751 square mile area in north Houston, Texas. A fourth college, Montgomery College, is scheduled to open in 1995. The District currently enrolls 18,000 credit and 30,000 community education students. NHMCCD is recognized for the quality of its educational program and is considered a leader in technological innovation.

Listed below are anticipated positions and qualifications of the ideal candidates. All positions are subject to budgetary approval by the NHMCCD Board of Trustees. Teaching assignments may include day, evening, and weekend classes. Junior/Community College teaching experience is desired,

All positions are nine-month contracts subject to renewal, unless otherwise specified. The positions listed below require a master's degree with 18 graduate hours in teaching discipline.

End Paper

FEW YEARS after the New York School spinshed copious nmounts of paint all across the art world, a new generation of young American srtists began to emerge, taking art in an entirely different direction from that of the earlier action painters. Jasper Johns, one of the most significant of this new breed, traced his lineage not to the Abstract Expressionists, but instead to the rich tradition of Duchamp and Magritte. Like them, Johns was concerned with the meaning we attach to words and images, and, like theirs, Johns's artistic responses contain within them several stunning visual metaphors of Einstein's new vision of space, time, and light.

The principal subjects of many of Johna's paintings were alphabets and number series. The same innovations that initiated the Greeks' inquiry into the nature of reality twenty-five hundred years ago became for Johns a place to begin to explore their hidden signifi-

Stunning Metaphors of Einstein's Vision of Space and Time

conce. In his work "0 Through 9" (1961), for example, Johns challenges the inviolability of sequence, one of the most sacred notions of Aristotelian time. No more precise metaphor for sequence exists than an arithmetic number series. The progression of 1, 2, 3, 4, . . . in time and space is the antithesis of simultaneity. Johns conflated these two opposing principles and made them complementary when he created a master image of all the cardinal numbers superimposed upon one another making it impossible to see them one at a time, instead

of the orderly marching seconds of a digital

watch. In Johns's version numbers are piled upon another in a neat simultaneous stack.

As the reader knows, there exists only one continuous stack.

condition of time in which the progression of all moments can be apprehended simultaneously, and that is when the world is seen from astride a heavy of the conditions of the beam of light. At C (the speed of light), all events would be superimposed on one another like Johns's numerals so that they would be seen simultaneously, instead of prosaically beaded together as on a linear string. Johns's painting is the most precise expression of the idea of the simultaneity of spacetime at C in the entire history of art.

The text obove is excerpted from Art & Physics: Parallel Visions in Space, Time & Light, by Leonard Shidat, a professor of loporoscopic video-usistieted surgery at the University of Colifornia at San Francisco. The book is published by William Morrow and Communication.

Church-State Doctrine Gets New Attention in Disputes Over Bonds for Religious Colleges

By GOLDIE BLUMENSTYK Legal skirmishes in two states he drawn new attention to the bonds by religious colleges viulates the doctrine of church-state sepa-

Beth cases—a lawsuit in federal court against David Lipscomb Unitersity and a potential luwsuit in a Virginia state court concerning Reat University—dead with the colkges' use of tax-free industrial revme boads to finance cumpus construction projects.

Rends Already Sold

The Lipscomb ehallenge affects \$15-million in bonds that have alith the endorsement of the Nashalle and Davidson County Metro-

The Regent case concerns \$10milion worth of bonds that were shortzed by the Virginia Beach Chy Council in June but that have not gone through the entire pvemment-approval process. Opments of the bonds were unsuccusful in challenging the city omnell's action but promised to inarrese when the college presents he bonds before a state circuit cont for "validation" us a legitimie public purposc.

The two eases cume as the U.S. Supreme Court was weighing case that could dramuticully describe legal rules defining guyment involvement with religion. That case deals with prayer ut tublichigh-school aradoution cerenoies. The Bush Administration has asked the Supremic Court to

anarket rates because buyers of the so the case to throw out the stundards it has used since 1971 and apiece them with new constitu- state or federal tax on the income. final guidelines that would allow greater government uid to religious ons, including uid pravided lowing the colleges to use such pected to rule this year.

The current standards allow gov- ment subsidies to the religions inments to provide aid to religious stitutions.

Last year the Supreme Court of poses, except in cases where the Virginia upheld that line of thinking in a case involving Liberty University. The unanimous ruling said that because Liberty was "pervasively sectarian," it would be unconstitutional to allow the institution to henefit from a \$60-million band issue previously authorized by Lynchburg city officials.

> "The Facts Are Very Close" Opponents of the bonds for Lipscomb and Regent Universities

make the same argument. The Virginia case is not controlling in fennessee, but the lawyer

for Americans for Religious Liber-

ty and the five other Tennessee plaintiffs said that because the Virginio Supreme Court had made its ruling on both state and federal constitutional grounds, the case has applicability in Tennessec. Says Joseph Johnston, the low-

Regent, however, insist that their water. cases are different. They say their Institutions are not controlled by religion to the same degree as is Liberty, Lipscomb officials also note that 14 other religiously affiliated colleges in Tennessea have used similar tax-exempt financing.

Lipscomb is affiliated with the Churches of Christ and requires its full-time students to attend daily Bible classes and chapel services. According to the institution's bylaws, all employees, except those in food service and buildings and grounds are expected to be memhers in good standing in the Churches of Christ.

Statement of Faith

Regent, previously known as CBN University, is a graduate school founded by the religious broadcaster Pat Robertson. Application forms mailed as recently as last summer ask students to sign a statement of faith that reflects fundamentalist religious views and a commitment to the mission of 'world-wide evangelization." 'fhe university is not affiliated with any particular church, and, according to its spokeswoman, 26 denominutions are represented in its student

Lipscomb's president, Harold Hazelip, saya his institution differs from Liberty because it is not controlled by a single church. He adds: "We have a value system but it is not forced."

The Rev. Tom Baker, o Presbyterian minister who is one of the plaintiffs in the cese agoinst Lipsomb and Nashville, says the fact that other religious colleges have benefited from such bonds is irrelevant.

Moreover, he says, Lipscomb's leaders place "a heavier emphasia on their form of religion than others." Mr. Baker says he has no "The facts are very, very hostility towerd Lipscomb. But, ha "I just think everybody lose. snys, I just think everybody officials of both Lipscomb and should carry their own bucket of

Setback for Opponents

Before the religious nature of Libscomb und Regent can be established in court, the eases must get to the triol stage.

Opponents of Lipscomb's use of bonds were dealt n setback this month when a federal magistrate in Tennessee recommended that the case be dismissed without a trial.

Megistrate Kent Sendidge said the plaintiffs had not shown that the bond issue had injured them as. taxpayers. The pleintiffs say the magistrate misunderstood the requirements for atanding in taxpoyer suits and plan to appeal.

Regent, meonwhile, has delayed the final stage of the process for obtaining tax-exempt financing. Opponents of the bonds say they believe Regent is waiting to see if the U.S. Supreme Court case creates a friendlier legal climate for such bonds.

Joseph Conn, a spokesman for Americana United for Separation of Church end State, the organization that fought Liberty's bonds, says it appears that Regent hopes "that the Court will lower the rule of separation enough that they cen go over" it.

The Regent spokeswoman says that to her knowledge the institu tion is not waiting for the Supreme Court to act, and that Regent officials expect that this bond issue, like the \$4-million one they received in 1984, will ultimately be

WASHINGTON UPDATE

- New federal committee will study future of higher education
- NiH to add funds for projects involving disabled researchers
- Temple U. prevalls in dispute over state Medicald payments

A top Education Department official, contending that higher education does not have a vision for the future, has established a comrolttee to examine the challenges that colleges, universities, and trade schools will face in the next century.

Carolynn Reid-Wallace, Assistant Secretary for posisecondary ducstian, told reporters last week that the "21st Century Committee" would examine student demo- rv." he soid. graphics and "think boldly and creallyely" about the future, "What aught we to be teaching (students) and what kinds af issues ought we ta be addressing?" she said.

Charles H. Karelis, director of the Fund for the Improvement of Postsecondary Education will head the committee of department personnel, which will seek advice from college administrators, business leaders, and lawmakers. Ms. Reid-Wallace said the cammittee's work would help colleges and "serve as a foundation for our work in this office for the next few

years."
"In the higher-education community, we have not, for whatever reasan, articulated an intellectual vision," she said. "We've just nut

In response to a question about whether the Education Department would provide more money for student aid if the committee concluded that such funds were needed, Ms. Reid-Wollnce gove no ossurances, "I would be very sur-prised if there was 11 student in this country who wanted to go to college who could not find a package of grants and loans that would support not the full cost of college, but a significant portion of that cost. she said. "I'd be very, very surprised if we could come up with 10 such students in all of America," she added.

Ms. Reid-Wallace said msny things needed to be done to improve higher education that did not require additional funds, such as finding woys to encourage more female ond minority-group students to pursue science and engineering. -THOMAS J. DELOUGHBY

The National Institutes of Health will begin this month to provide supplemental funds to grant recipients who work with disabled faculty members or

students on research projects.
The program was started in response to a 1989 report by the President's Task Force on Women, Minorities, and the Handicapped that stated that few disabled individuals were pursuing careers in science ond engineering, according to Wal-ter Schaffer, director of the Office of Research Training and Special Programs at MIH.

Visually impaired, deaf, meatally or emotionally ill, and leorning-disabled students and faculty members are eligible to participate in the program, Mr. Schaffer said. "The disabled student or faculty

member must contribute to the project in a very real way," he stated. "We will nut give extra funds legal hands of hospital opens to projects where disabled individuals are just wushing dishes or feeding the rats."

Money will be provided for the salnries and certain expenses of the disabled student or faculty member. Also, muney will go for equipment "that could help the individual with disabilities in the luborato-

Mr. Schaffer said the approach was based on a program that provides extra money to investigators who work with minority students and faculty members.

He said it was too early to know how much the program would cost -STEPHEN BURD

Temple University and other operators of hospitals that serve large numbers of poor patients won a legal victory last week when the U.S. Supreme Court let at and a ruling favoring Temple in its dispute with the state of Pennsylvania over Medicaid

In declining to hear the case, the Court upheld two lower-court milings that suid Penusylvunia's reinibursements to Teniple for its cost of serving Medicaid putients were

inudequate and therefore illegal. The Court's action directly affects unly the states in the Third Circuit Court of Appeals-Deluware, New Jersey, and Pennsylva-

nia. But a luwyer for Temple se throughout the nation who bein their states are shortchanging der in Medicaid reimbursements.

"This decision means the stee do not have a free hand in outer their Medicaid appropri ply to satisfy their budgeter needs," said George E. More university counsel at Temple. Medicaid, the federal program

thut provides medical care farte poor, require states to pay about half the costs.

Temple and 130 ather hospid aperators challenged Pennote niu's reimbursement rates in 198 ufter the state reduced its Medical spending by 14 per cent for bules tary rensons. Business & Philanthropy

James Piarason of the John M. Olin Foundation: "Let's not raise questions about where funding comes from. All acadentic programs have to be funded. I'm net complaining that people on the other side are receiving funding, am It's

Olin Fund Gives Millions to Conservative Activities in Higher Education; Critics See Political Agenda

tty LIZ McMtLLEN

What do Allan Illaom, Dinesh D'Souza, Roger Kimball, William Bennett, the Mudison Center for Educational Affairs, and the National Association of Scholars have in common? Besides being sharply critlent of what they regard as the left-wing tilt of American higher education, they have reccived thousands of dollars from one

surrec-the John M. Olin Foundation. Over the last 10 years or so, the Olin Foundation has given millions to support student newspapers, think tanks, and prominent thinkers writing about higher educution. In a relatively short time, it has carned a reputation as a highly successful grant maker. One foundation observer, noting its highly focused, strategic activities, calls it the most effective private foundation

It has also earned a few enemies.

The problem, as sume academics see it. is the conservative cast of the foundation's goals and its use of millions of dallars to support activities that directly challenge the spread of diversity and multiculturalism on campuses. Far from promoting objective, dispassionate scholarship, as it claims, the Olin Foundation has an explicit political agenda, with ties to officials in the Republican Party, these critics argue.

Involved in the PC Debate

Olin has come under fire from Teachers for a Democratic Culture, for example, a group formed to defend curricular reforms. Trying to call ot-

tention to the source of the finnncial backing of many critics of higher education, the group prepared a fact sheet about Olin grants that drew from the foundation's annual reports. The fact sheet was distributed at lost month's annual meeting of the Modern Language Association.

"The whole issue of the politics of funding needs to be opened up and discussed much more thoroughly," says Gerold

Garald Graff, laft, of Teachers for a Demo

lesus of the politics of funding neads to be

opened up and discussed more thoroughly.

Culture, with co-director Gregory Jay: "The whole

Grnff, a coordinator of Teachers for a Democratic Culture and an English professor at the University of Chicago.

As the debate simmers over "political correctness" and what should be taught in college curriculn, the question of who supports what is a hot issue these days. The Olln Foundation, more than any other conservative fund, has become u player in that debate. And that makes its directors very

James Piereson, the foundation's executive director, says Olin's grant aupport is aimed at opening up a "closed community" at colleges, where ideas that don't coincide with the prevailing "orthodoxy" are eemed racist or sexist. " 'Totalitarian' is not quite the right word for it, nor is 'authoritarian,' " Mr. Piereson says. "It's certainly repressive. Whatever it is, it's bad for higher edu-

Open About Its Goals

Although the foundation is open about its goals and the kind of projects it supports, Mr. Piereson challenged the use of the word "ideological" to describe the foundation's activities. 'Ideology' suggests an orthodoxy,' Mr. Piereson says. " 'Philosophical principles' might be a better way to characterize it. We have a different understanding of what is at stake

Criticisms about aources of financial support strike Mr. Piereson as an attempt to silence debate. "Let's not Continued on Following Page

Olin Fund Gives Millions to Conservative Activities

ing comes from." Mr. Piereson says. "All academic programs have to be funded. I'm no plaining that people on the other side are receiving funding, am 1?"

With assets of about \$70-million the Olin Foundation ranks 266th among the country's large founda-tions in terms of overall wealth, but in terms of grant making, the foundation ranks much higher, 49th, By federal law, n foundation must spend at least 5 per cent of its assets for charity. Olin a warded more year-more than \$19-million

Over the years, the foundation has awarded an incressing proportion of its assets-a move, Mr. Piereson suys, to eventually spend itself out of existence. "Mr. Olin didn't want it to be a permunent foundation, because they tend to get captured by people with differ-

Major Defense Supplier

Although the foundation was established in 1953, it didn't begin significant grant making until the death of its donor in 1982. John Merrill Olin was the son of Franklin M. Olin, the founder of one of the companies that eventually became the Olin Corporation, n large manufacturing company that today produces chemicala, metal products, industrial papers, skia, and porting ammunition. The company ia also a major defense supplier.

In 1977, Mr. Olin chose William E. Simon, former Treasury Secretary under Presidents Nivon and Ford, to aucceed him as president of the foundation. Mr. Siman continuca to serve in that role. As with

sion about who will get grants; about one in four applicants receives support. Many grants are re als, the fund has many fins, but it newed each year, but occasionally even has a few admirers among Olin will solicit the opinions of

The general purpose of the foundation, as laid out by Mr. Olin, is to ences with the positions Olin sup-"provide support for projects that ports, Waldemar A. Nielsen, an reflect or strengthen the economic. political, and cultural institutions tions and a noted observer of phiupon which the American hentage of constitutional povernment and private enterprise is based." Minority-Group Enrollment at Colleges Rose 10% From 1988 to 1990, Reaching Record Levels

Black students showed largest two-year gain since 1980, to reach high of 1.2 million, U.S. reports

By JEAN EVANGELAUF

WASHINGTON The college enrollment of minority group members rose 10 per cent from 1988 to 1990, renching record levels for all groups, the U.S. Department of Education snid Inst week.

In a report of its biennial survey an the racial and ethnic characteristics of college students, the department cited the fallow-

ing figures: From 1988 to 1990, the enrollment of American Indians and Alaskan Natives rose 10.8 per cent, to 103,000.

"The enrullment of Asian and Pacific Islanders climbed 11.7 per cent, to 555.000

"The number of black, non-Hispanic students increased 8.2 per cent, to 1.223.000

"The ranks of Hispanic students rose 11.5 per cent, to 758,000. The number of white, non-Hispanic college students went up 3.8 per cent, to

th 675 (XX). ■ The enrollment of foreign studentsnon-resident uliens studying in the United States on a temporary basis-grew 10 per

Over all, white students accounted for 77.9 per cent of the 13.7 million students enrolled in 1990, followed by blacks, 8.9 per cent; Hispanies, 5,5 per cent; Asiuns, 4 per cent; foreigners, 2.9 per cent; and

American Indians, D.8 per cent. The American Council on Education, in

a new report that included the Education Department's 1990 enrollment statistics, called the minority-group figures "encouraging signs far the future" but warned that the gains were threatened by the current economic recession.

We cannot allow attempts to balance federal and state budgets to eradicate efforts on behalf of minorities in higher educatian," said Robert H. Atwell, the council's preside

We would be wrong to look at the numhers, see progress, and conclude that recruitment and retentian programs on behalf of underserved groups are no longer necessary," he continued. "We made that mistake in the late 1970's, and we have been struggling ever since to regain those

concern among educators and policy makera, showed the largest two year gain since

From 1988 to 1990, the number of black male students grew 7.4 per cent, lo 476,000. That total edged past the previous high of 470,000 reached in 1976, the year the survey was first conducted. The number of black femnic studenta rose 8.7 per cent from 1988 to 1990, reaching a record

College-Going Rate In Stable

Although black enrollment rose 10.5 per cent during the 1980's, the college-going rate of blacks remained stable. During the deende, the proportion of 18-to-24-yearold black high-school graduates en rolled in college averaged about 28 per cent, according to Censua Bureau statistics cited in the department report.

The enrollment of Hispanic students followed a similar pattern. The number of auch students jumped nearly 61 per cent from 1980 to 1990, but the college-going rate of 18-to-24-year-old Hispanic highschool graduates remained steady at about 29 per cent.

In contrast, the college-going rate of white youths increased from 33 per cent in 1981 to 40 per cent in 1989, while the number of white students rose 8.6 per cent from 1980 to 1990.

Because of an inadequate sample size, figures on the college-participation levels Continued on Page A37

More Freshmen Say They Are Choosing Colleges Based on Costs

By MICHELE N.K COLLISON

More than in the past, students now let their pocketbooks guide them when it current to choosing a college, n wide ranging survey of freshmen has found.

The survey was conducted last summer and fall by the Higher Education Research Institute at the University of California at Los Angeles. The results are based on responses from 210,000 students enrolled at 421 colleges and universities.

1971 73 75 77 79 81 83 86 87 89 9

Twenty-seven per cent of the students surveyed said they had selected their colleges because of low tuition. In 1990, 23

per cent of the freshmen reported doing so. The proportion of students who said they had chosen a college based on offers of financial aid also increased-to 28 per cent, up from 25 percent in 1990. In addition, more students said they had chosen their college or university because it was close enough that they could commute to the campus and hence save money. Twenty-one per cent of the students questioned in 1991 said they had selected a college because it was near their home, compared with 20 per cent in 1990.

More Plan to Get Joba

More students also must work to pay their college expenses, the survey found. Thirty-seven per cent of the students aurveyed in 1991 said there was a "very good chance" that they would have to get a job to help pay for college. In 1990, 34 per cent thought they would have to work. The number of students who said they would have to work full time to pay their college expenses rose to 4.8 per cent in 1991 from 3.5 per cent in 1988.

Taken together, these figures suggest that neither financial aid nor personal or family resources are keeping pace with the costs of attending college," said Eric L.

report describing the findings.

"Apparently, economic realities are forcing many atudenta not only to go to work while attending college, but also to choose collegea on the basis of economic, rather than educational considerations, Mr. Dev said.

Steep tuition increases at many colleges made students look to the institutions that Continued on Page A36

U.S. Projections of Enrollment Revised Upward

Continued From Page A1 and older. Such students will account for 23 per cent of the enrollment in 2002, up from 19 per cent in 1990. The share of enrollment of those under age 25 will remain at nhout 57 per cent over the period, while the proportion of those from the ages of 25 to 34 will drop to 20 per cent from 25 per cent.

The number of new high-school graduates is expected to remain stable at about 2.4 million n year over the next several years. Beginning in 1995, the number of graduates will rise, leveling off at about 2.9 million from 1999 to 2002.

Following the pattern of enrollment increases, the number of academic degrees uwarded annually by colleges is expected to rise steadily throughout the next decade. From 1991 to 2001, the number of associate degrees awarded will rise 15 per cent, to 539,000; bachelor's degrees will increase 12 per cent, to 1.2 million; and doctor-

ed etheir backgrounds in public wieges was higher, with such inas attracting 87 per cent of tretican ladians, 86 per cent of Signics, and 80 per cent of

Following the pattern of the 1807s, misority students were are fiely than white students to trol at two-year colleges. In 1990,45 percent of minority and 37 Proceedings of white students attended

Cing technical problems with te 1990 survey, the department upof that caution he used in interpating data for public two-year intions, Because of incomplete disonia, Floride, Huwaii, Indisa, and South Dakota, the departreal estimated the distribution of amilment by race and ethnicity brabout one-third of communityolege earollments. The departestypically applied the 1988 dis-tibutes to the 1990 figures on total arclinent.

mgress 'Uneven at Best'

The Education Department staics cover students enrolled in he States and the District of Culamba, and exclude those in Puer-b lice and other outlying areas. The American Council on Edu-

special section on racial and ethnic employment trends in colleges and imiversities.

Minurity progress in college employment has been "ineven a best," the report said, with American Indians, blacks, Hispanics, and U.S.-born Asians "severely noderrepresented" on most college faculties. In 1989, about 11.5 per cent of full-time faculty memhers were members of minority groups, up from 9 per eent a decade

Efforts 'Still Much Needed'

The share of minority faculty members with tenure remained stablc during the 1980's at about 60 per cent, while the proportion of white fuculty members with tenure went up three percentage points, to 72 per cent.

From 1979 to 1989, the propor tion of full-time college workers who were minnrity-group members rose from 18 per cent to 20 per cent. However, American Indiuns blacks, and Hispanies were more likely than white men to hold nonfaculty and non-managerial jobs.

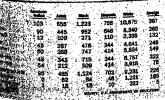

"Affirmative and turgeted efforts are still much needed, und, in fact, must be strengthened during the 1990's if higher education is to increase the representation of people of color in faculty and leader ship positions," the council said in its report.

The conneil called on calleges to work to increase the number of minority Ph.D. recipients, to make the faculty hiring process more fair, and to insure that once hired, minority faculty members are "supported and mentored to achieve success in teaching, re-

search and publication." Copies of the American Council on Education study, "The Tenth Annual Status Report on Minorities in Higher Education," are available for \$10.50, prepaid, from ACE, Publications Department, One Dupunt Circle, Washington

SOURCE: U.S. DEPARTMENT OF SUCCATION

The Netional Football League end Netional Basketball Association should consider forming farm systems to train plevere, according to the Nationa Collegiate Athletic Association's executive director, Richard D. Sebultz

Responding to complaints the tough new gendemic standards would limit access to NCAA colleges. Mr. Schultz noted at the association's annual convention that there were other oversets for junior colleges and area schools.

soid. "maybe it's time for the NEL systems so people who don't wont to to develop their skills."

A vote et the NCAA ennual meeting could create a "new level sports. So said one person at the NCAA meeting, where delegates rejected a carefully crafted proposa that would have created a new nonscholarship, low-cost playing level for football in Division I.

Proponents of the new division, known as I-AAA, argued that it was a necessary follow-up to a rule approved last yeor barring Division I colleges from playing football in Division III after August 1993. Division III membors had complained that the 22 colleges that played basketball in Division I but football in Division III had an edge in size and resources over the "Itu Division III colleges, although they

ployed by the same set of rules.

The proposal to create a I-AAA enbeligieion was fovored not only by the 22 affected colleges but by 25 or so Division I institutions that were interected in starting football teams if they could do so at a low cost.

The proposal, which had to be epproved by a majority of colleges in all three divisions, was rejected by Division II members, mony of which have burred their institutions from moving up to Division I to ploy in the now football division. The Division I colleges without a

home for their football progrom are exploring their options. They may either play in Division I-AA, which offers limited scholorships, or try to establish o non-scholarship playing level within Division I-AA.

The NCAA's delegates took s etep-albeit a small one-toward giving athletes a emoother peth to the professional leagues.

The delegates did not go so far os to give athletes the right to enter professional-league drafts without forfeiting their etigibility, as Mr. Schultz and advocates for athletes

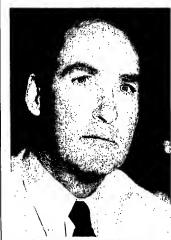

1.00

But they did vote to give athletes the right to talk with executives of professional teams to gauge their market value and how high they might go if they onlered the drafts os long as they do not use an egent in

Athletics

NCAA's Leaders See Big Strides in Effort to Reshape Sports

Although academic standards are applauded, some observers question status of reforms

Jemes Delany of the Big Ten: 'The netional rula mekars should hand the mentie to the institutions and the conferences."

Thomas K. Hearn, Jr., of president's commission: "Wahave done meny of the major things that needed to be done."

By DOUGLAS LEDERMAN

With the adoption of tougher academic standards at its annual meeting this month, the National Collegiate Athletic Association has made major strides in its campaign ID reshape college sports, its leaders say.

Since the NCAA's executive director, Richard D. Schultz, issued a atirring call in January 1990 for a "new model" of college sports, they say, the group has taken steps to achieve many of the goals he laid out. Costs and time demonds on athletes have been reduced, presidents have re-estoblished themselves os the association's dominant force, and o formulo for sharing television revenues more fairly has been introduced, to nome o few of the gains.

The key remaining component of the "reform" age nda-a plan to certify sports programa based on how well they "fit" in their colleges-is due for consideration at next January's annuol meeting.

"I think everybody believes that wo have done many of the major things that needed to be done," said Thomas K. Hearn, Jr., president of Wake Forest University and o member of the NCAA's presidents' commission

Strategic Plan for Next 3 Years

Mr. Hearn and other presidents ore quick to add that they do not believe their work in done. They note that their strategic plon, which sets their agenda for the next three years, plots an aggressive course. While there is broad agreement about

year will do little to coae the escalating financial preasures on sporta programa, and that colleges have yet to gropple head on with the challenge of providing equitable treatment to women's sports.

the virtue of the new acudemic standards,

none of them really come to

Some may the reform movement has

ments of the last two years.

Others note aerious atorm clouds that still hover over college sports in the form of legislotion from federal and state lowmokers and tax scrutiny from the Internal Revenue Service. The NCAA's recent chonges, they say, have done little to repair the damage college sports hove done

recently to the image of higher education. Still others say the NCAA's leaders have barely acknowledged, let alone addressed, a more fundamental problem. That truly

menningful changes cannot be seen plished until the NCAA diminishes theen mous financial incentives associated wi winning und the perception that high sports are more professional than amore

"No one at this point could feel temb secure obout the future of college sport said John Weistart, a sports-law expent Duke University, in an interview. "Whi some of the steps that have been taken laudable, none of them come to grips will the megaquestions, like the comme ism and the links to television revenue

"We can take pride to what has been accomplished, but it would be naïve and think that the real mojor steps are s ahead of us," said James J. Whalen, per deni of Ithaca College and former mem of the presidents' panel. What coles' sports need, Mr. Whalen said, is 'not reform" hut "revolution."

'New Model' Proposed in 1990

The current wave of reform can be troced to Mr. Schultz's "new model apeech in Jonuary 1990. Three years caller, the NCAA's members had rejected as rise of cast. ries of cost-cutting measures offered by the presidents' commission, and the part deeply divided over how to proceed, it dedicated itself to a period of study.

Mr. Schultz's 1990 apeech was imper lant because it marked the first lime that top official of the NCAA had urged significant chonge. He called for major carbols

NCAA's Leaders See Major Strides in Effort to Reshape College Sports

letes' time, and in spending; for tougher academic standards, tenure for coaches, and neer review of sports programs; and for the elimination of athletic dorms.

Two days later the NEAA's memhers cat spring football practice by a third and sliced three games from the busketbali season. The presidents' commission had lobbied hard for the changes, and coming after a long dry spell, their passage was a major triumph for the panel.

Non-Legislative Steps

More successes followed in Junuary 1991, when a package of costculting measures and limits on time deninnds fur nihletes was passed overwhelmingly. At the 86th annunl meeting this month, the NCAA's members approved the presidents' aggressive set of academic proposals, despite bitter oppositiun from black-college presidents.

The association has taken nonlegislative steps as well, develop ing a new system for dividing among its members the \$1-billion from its televised-basketball contract with CBS and proposing a revomping of its investigative procedures to address lawmakers' concerns that the procedures trample on the rights of its members.

The pian for peer review, or cerlification, of sports programa is to be considered at next January's meeting. It has yet to be defined in full, and different groups have different visions of the peer-review process. There is disagreement, for

include panitive measures.

But in most versions, learns of

NCAA staff members or sports officials from other colleges would review how an institution's sports program performed in such nreas ns the admission and aendemic performance of athletes, finances, governance of athletics, and the behavior of coaches and athletes.

Mr. Schultz, the presidents commission, and the Knight Commission on Intercollegiate Athleties have put much of their emphasis on the certification plan, which they see as an entirely different way of holding colleges accountable fur the performance of their athletes and spuris programs.

Once certification is approved.

Mr. Schultz snid at the end of this month's annual cunvention. "I would hope we could kind of step bock, take a deep breath, finc lune. and let these proposals settle in so we can be sure they are doing what we wanted them to do."

Most Programa Show a Deficit

Despite the progress, many of the prublems focing the NCAA show no signs of waning. Perhaps the biggest current threat to the viability of big-time college sports is their deteriorating finnncial condition.

Moal sports programs already operate at a deficit, and television revenues seem certain to shrink this decade. Most sports officials admit that the financial cuts made so far have barely scratched the surface of what's needed. The problem is, they rarely agree about

what is necessary-and whether it can be achieved nationally.

"I think we've done about what can be done at the national level," said James E. Delany, the Big Ten Conference chief. "At a certain point, the national rule makers shouldn't necessarily withdraw. but they should hand the montle to the institutions and the conferences and say, 'We cnn't do everything through national rules."

But some other sports officials believe that significant changes are still needed-chaages that can only be promoted at the national level.

Gary R. Roberts, an assistant law dean at Tulane University and chairman of his institution's athletic council, believes the NCAA as a group must address the sticky problem of reducing the financial benefits of winning.

"Until something can be done to reduce or eliminate the revenue incentives for winning, you are aiways going to have the types of perversions and compromises that the reforms are trying to con-

Mr. Whalen, the tibaca president, also believes the association must curb its members' "appetite for money," among other "radi-

eal" measures that he says can only be achieved nutionally. But he recognizes, he snys, the unwillingness of presidents and sports officials to consider changes that would significantly revamp higtime sports as they know them.

Bills Pending in Congress

The percention that college officinis are reluctiont to make meaningful changes on their uwn also is driving the interest of state and federal lawmakers. A half-dozen bills that would affect college sports are pending in Congress.

The most sweeping, offered by Rep. Tom McMillen, a Maryland Democral, would grant the NCAA u continued exemption frum federal antitrust laws only if it made major rules changes, including creating a overning panel of presidents and altering its revenue-sharing plan to divide the money more evenly.

Nothing achieved by the NCAA al the Inst convention seems to have dissunded Representative McMilien of the need for his bill.

"The NCAA has accumulished a lot in the acodemic oren, but you're not going to change the system unless you change the mancy," he

"The unly organization that put that genie back in the bottle the United States Congress." Mr. Roberts said he had mind canoliums about the recent reforms.

"Everything they've done sofar will help to eliminate the exploit. tion of a lot of kids, and will in prove samewhat the image of the nation's colleges," he said. "But fear that it doesn't do as much as needed, and that improving their age without addressing some car cal substance is in some waysreplive because it takes the presse off to forge ahead,"

The leaders of the presidents cummission suy they are address ing that point by creating their sintegic plan, and by developing appe posal to strengthen the power of the presidents' panel.

The strategic plan "leffs i residents the job's not fluished and alerta them to the fact the there are many miles to go," said R. Gerald Turner, chancellor of the University of Mississippi and augoing chairman of the commission

"With all the visibility given in sport, and with the seeds of d struction that are in every program ran amok, 1 think most pr are in for the lone haul."

ANC, Other South African Groups Seek Talks With Government on Future of Education

By LINDA VERGNANI

CAPE TOWN With the process of drafting a new constitution now under way in South Africa, the African National Congress and several non-racial education groups are seeking a forum where they can negotiate with the government over the future of education and the policies that will guide it.

Both the ruling National Party and the ANC hove stated that an interim government could be in place as early as July. The shift will bring radical changes to the segregated school system as well as a major reassessment of higher education and the government's role in supporting it. What proportion of the education budget should be spent on postsecondary institutions is among the major issues to be decid-

The Convention for a Democratic South Africa—the body responsible for drafting the constitution—is not expected to involve itself in the specifics of policies and

programs in areas such as education,

As a result, the ANC, the National Education Coordinating Committee, and other groups are oow racing to develop education policies. Those groups would like to put some of the policies they draft on the table in the negotiations they are seeking with the present government, so that immediate changes could be made in the education system. Other recommendations would be presented later to the interim government. Last week representatives of everal groups involved in such efforts met in Johannesburg to discuss and coordinate their policy recommendations.

"The anti-apartheid intellectuals were so caught up in opposing apartheid that we never got into policy options, because most of us didn't see ourselves in policymaking positions in our lifetimes," said Nico Cloete, geoeral accretary of the Union of Democratic University Staff Asso-

BANNED FOR HALF A CENTURY

Fraternities and Sororities Are Reborn on Campuses in Estonia

By BURTON BOLLAG

CARTIL ESTONIA There has not been time to restore Estonia's first fraternity house to its former elegance. But the scene in the still-shabby and largely bare interior of the build. ing, which was returned only last fall to its student owners, suggests the shape of things to come.

Inside the large, gahled brick house located just off the earnings of Tartu University here, a student in a three-piece gray suit practices billiards. A few play darts. Others lounge around rending or joviidly chatting.

Kaurel Turund, 11 member of the finternity, explains that while some other imternal organizations here are reviving the noble art of fencing, this group-known as the Estonian Student Society, or Ess, uses swords only "to conduct singing sessions.

The fraternities are quite oldfushioned," suys Mr. Tarand, who is also president of the university's student union. "We took over where our fathers and grandfathers were hanned."

Long and Storled History

The fraternities here, which have a long and storied history, were not allowed to operate for five decades, until a ban on them the Ess fraternity house. Inde-Fruternities played a central role was put together from the ESS fra-

ally annexed the three republics.

thousands of Baltic intellectuals to Siberian labor camps prompted many more to flee as refugees The émigré intellectuals and their children kept the Baltic fruternities alive in exile, with chapters un the campuses of several dozen U.S. universities. Now those overseas societies are providing money and encouragement to help chapters at institutions in the Baltics revive themselves.

Interest in the fraternities appears greatest at Tartu University. Founded in 1632, the institution is strong on tradition. An es-

student body of 6,000t have joined Soviet deportations of tens of the 20 or so fraternities and sororities that have opened, or reopened, in recent months

> 'Students Were Too Passive' "We like that," says Priit Heinsulu, assistant to the university's rector, "They educate their members und teach discipline. Under the Soviet system, stu-

"Divining which is which is gume to be difficult" for foundations ed societies looking to financi reserces to specific institutions, Mr. Lerch says. "The former Sovin Union as a whole is a sinkhule."

Mr. Stone says his plan to prusite modest subcontracts to Rusmresearch institutes could avoid tal problem, since institutes that to not return work of the highest quality would not be given addi-ional support.

Someone Specifie'

"Let's put this on a capitulist bais," he says. "Let the American ciralists figure out who's who." loseph McGhee, director of exdanges at the U.S. Stute Depart zent's Office of Independent Sies and Commonwenith Af his-until recently called the Ofke of Soviet Union Affairs-says hat because funds cun he casily stagled or lost within the Rus sia bareaucracy, groups sending noney to help scholars there shall "have someone specific in

Victor Rabinowitch: "Wa ara concarned that practically a whole generation of scholars and creative individuals may be lost."

Donutions of equipment, he adds, can run into additional prob lems with customs regulations in Russia, U.S. export-control regu-

"Unless there's a competent consignee on the other end, God knows where it's going to end up," be says.

Loren R. Graham, a professor of the lastory of science at the Massir clinsetts Institute of Technology, says that because the "organization of Russian science and enture is presently in turnoil, direct assistance to orajor institutions should probably be avoided."

struggles going on," he adds.

Mr. Grahum and others are also

concerned that a Russian tax of ns much us 60 per cent on fureign donutions of funds and equipment and an official exchange rate that cau significantly reduce the value of finuncial contributions could inhibit support from U.S. foundations and other non-profit organi-

Favorable Exchange Rates Eugene B. Skolnikoff, a politi-

al-science professor at MIT. says foundations that intend to send money should demand that their currency be exchanged at the more favorable tourist rate of 100 rubles to the dollar, rather than the official rate of 1.5 rubles to the dollar. He and Mr. Graham emphasize

that American groups should also try to negotiate an end to the Russian tax on foreign contributions. Mr. Skolnikoff visited Russiu last month, many scientists they spoke to expressed the fear that the tax would be an obstacle to foreign contributions. "Very often, they mentioned that tax," says Mr. Gru-In a letter that the two MIT pro-

foreurs have been distributing to foundations around the country, two officials of the Russian Academy of Sciences, Victor M. Sergeev uud Artyoni Mnatsnkunyan, urge Western groups considering ways We easily could support the of helping Russian science to meet

un end to the tax and to institute prucedures through which funds can easily be sent to specific Russian scientists and institutes.

Mr. Rabinowitch of the MacArthur Foundation agrees with the recommendations of the Russian scientists, noting that foundations and other non-profit institutions

"Everybody feels there's a

treasure of Soviet Intellectual activity that

needs help, needs to be

saved before it goes down the drain."

der U.S. Internal Revenuc Service

These toxes have got to be a matter for negotiation, as do the exchange rates," he says.

Mr. Skolnikuff of MIT says that because they can respond quickly and provide finuncial assistance with less red tape and political controversy than the U.S. government foundations and other nonprofit institutions offer the best hone to Russian scholars, at least for the near future.

"Whatever can be done should be done quickly." he says. "And the largest hope of moving fast is with the foundations."

Other, more pressing problems-such as starvation, bolster-ing the Russian economy, and keeping Russian nuclear scientists from selling information about my clear-weapons technology to other countries-are likely to get the most attention and help from the U.S. government, Mr. Skolnikoff and Mr. Graham say, Thus, they add, it would be appropriate for foundations to focus on such areas as preserving the best aspects of Russian fundamental science.

"It's not at the top of everyone's agenda in terms of relief," says Mr. Skotnikoff "But it's one of those areas where a little money can go u

'Flood of Applications'

Mr. Graham says organizations considering programs to support scholars in Russia should work together to establish a joint U.S.-Russian committee that could inpartially review proposals for assistance. "For a foundation or American prospiration simply to declure itself open to applications for support to young and tulented Russian scientists and artists would result in a flood of applications that would be difficult to eval uate." he says

He and Mr. Skolnikoff say the programs should also encourage Russinn scholars to remain in their country to avoid exacerbating the brain drain. They say programs also should emphasize support for vounger scholurs, who are not as politically well connected, or insulated from cuts, as the older schol-

Groups Seek Talks on Future of Education in South Africa

Continued From Preceding Page ciations. "When the terrain suddenly changed, the struggle for pol-

Mr. Cloete took part in last week's meeting ns co-chairman of the postsecondary group of the Na-tional Education Policy Investigation, which is studying policy op-tions and recommendations for groups that are trying to draft plans for a post-apartheid South Africa. He said the discussions focused

on crenting a broad "socio-economic forum" thet could negotiate with the government on specific issues, including education

Educators here say the urgency of negotieting a new future for public education in South Africe has been underscored by the recent announcement that only 39 per cent of 275, 173 black students who took the final school-leaving examination had passed. In contrast, 96 ner cent of the 65,933 white students who took the exem passed. Of the pool of black candidates, only 28,051, or 10.2 per cent, had the minimum grades to qualify for ad-mission to a university, in contrast

Education Foundation, a private agency, described the test results for black students as "shocking. but not unexpected." He said that differences over education could pose a aerious obstacle in negotiations over South Africa's future and called for a national convention to discuss educational policies. Mr. van Zijl's foundation has been helping organize regional ed-ucation forums involving the ANC,

'Certain Kind of Malaise'

Lindelwe Mabandla, administrative secretary of the education department of the African National Congress, asid the test results dictated a restructuring of the system. "What it shows la that, despite the slight Improvement, there is a certain kind of malaise in the governence of black education," he said.

Roger Burrows, Democratic Party education spokesman end a member of Parliament, speculated that President F. W. de Klerk might announce steps toward the

of an additional 12,777 black students have yet to be reported.

Johan van Zijl, director of the opening of Parliament this week. departments, in his speech at the

The government says it has been trying to draw political and education groups into an "education forum" to discuss immediate problems and investigate a new educa-· tion system

Sam de Beer, the new Minister of Education and Training whose department oversees the schooling of blacks, recently told Business Day here that it was vital that auch a forum begin negotiating educathe government, and other groups. tion issues as soon as possible.

The ANC and other anti-apartheld political and education groups insist that such a forum have the power to determine policy and put it into effect. Mr. de Beer told The Chronicle that while it was too early to speculate on the precise functions of such a group, he did not foresee its having powers that cur-

rently "reside with government," Last year a Joint Working Group on education was formed after Nelson Mandela, the ANC leader, and concerned educators met with President de Klerk to discuss what to 27,550, or 41.5 per sent could serround the candidates. The test results scrapping of all segregated govern-

delegation, which included university vice-chancellors und representatives of the left-wing Azanian Peoples Organization, land six more meetings with top government education officials. While the group reached agreement on some issues, it failed to achieve its goal of setting up a "fully representative forum to discuss the reconstruction of education."

Government 'Didn't Deliver'

Jakes Gerwel, rector of the University of the Western Cape and chairman of the delegation of concerned educators, said the working group's efforts had been dominated by the government and "didn't deliver what people expected."

John Samuel, head of the ANC education department, has said that the format used for the Joint Working Group "did not produce results," and that a new mechaniam had to be found to engage the government on education issues.

The ANC's draft education policy guidelines are to be revised and consolidated at a conference next month. "People must be properly consulted and participate in the process," sald Mr. Mabandla. "We want aomething of lasting value to come out of it."

Mr. Cloete maintains that there

of education system we are gone to have, and that will be linked to certain political positions."
"Whatever policies get on then

ble will frame the debate," he said Among the issues Mr. Chete's policy board is investigating sreft governance and financing of un versities, access and standard and affirmative action.

He called the highersystem "incredibly wasteful." He said it was not simply a matter of taking money away from the trad tional white liberal universities an giving it to rural black universities because many of the black univer sities were inefficient and had no defined a role for themselves.

"The big liberal univers need to be Africanized," said Mr. Cloute. "The issue is to make mi versities like Wits"-the University ty of the Witwatersrand in Johan nesburg-"serve the needs of the majority of the population."

The black universities need to be developed, he said, "but the que tion is, What role will they play?

Mr, Cloete said the Union of

Democratic University Staff Associations would sponsor no interestional conference in July on trans-furming South Africa's universi-

GIVE YOUR RETIREMENT PLAN THE VANGUARD NO-LOAD, LOW-COST ADVANTAGE

In their rush for investment performance, retirement plan investors often overlook a significant harrier to performance — high

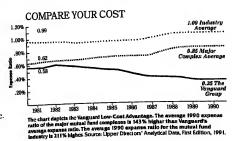

expenses. But cost should never be left out of the investment equation, because:

Lower costs mean higher returns

In a money market fund or a bond fund, lower cost (other things being equal) results in a higher yield, month after month. And in equity funds, lower cost can provide a significant enhancement to the compound rate of total return achieved over a span of years.

As the chart shows, Vanguard's cost advantage is dramatic. Our low expense ratio is less than one-third of the mutual fund industry average as reported by Lipper Analytical

We urge you to read a Fund's prospectus carefully before you invest or send money. It contains more complete information on advisory fees, distribution charges and other expenses.

For more information on Vanguard Funds and Retirement Plan Programs, call us toll-free: 1-800-662-7447.

INSTITUTE FOR THE MANAGEMENT OF LIFELONG EDUCATION

MLE

June 7 - 19

MLE is an intensive, residential program for 75 experienced administrators, nll of whom lead organizations that deliver edocational programs to adults. Some are presidents and academic deans of schools with significant adult populations; others are deans and directors of continuing education programs. Participants also came from professional associations, business, government, community agencies, and the military.

The program is a lively, stimulating forum for ideas that can be put to ose in creating new programs or improving existing programs. The formal curriculum examines three broad areas: (1) the adult as a developing and learning person; (2) organizational strategy-marketing, finance, and planning; and (3) leadership and organizational change.

14th annual program. Application deadline: April 1

MANAGEMENT DEVELOPMENT PROGRAM

MDP

June 21 - July 3

MDP is an intensive, residential program for 95 mid-career administrators in higher education. The gool of the program is to prepare these men and women to develop resourceful solutions to the problems they are likely to encounter as they grow

Most participants hold the title of chairperso director, dean, or associate denn. About half hold positions in academic administration; the others are broadly distributed across the major non-academic

Topics include: personnel policy and administration, financial monagement, human resource management, low and higher education, strategic planning, marketing, and small group leadership

7th annual program. Application deadline: Morch 15

INSTITUTE FOR EDUCATIONAL MANAGEMENT

IEM

July 5 - 31

1EM is designed for 95 senior-level administrators in higher education, most of whom are presidents, vice presidents, chancellors, provosts, or deans of major campus units. This four-week residential program examines critical issues in the management of colleges and oniversities.

The curriculum takes the perspective of the senior administrator, whose responsibility and authority shape institutional policy. Topics include: leadership, financial management, human resources, service delivery, law and higher education, compus community, strategic planning, ensis management, and institutional vision. Constantly updated curriculum materialsincluding the Harvard case method-ensure that the program is relevant to emerging campus issues.

23rd annual pragram. Application deadline: April 1

COMPLIMENTARY D President's Bands SELECTIONS.

Mme

write-in Candidati: was chosen as president-A elect and another as a director of the American Milological Associution at the group's annual meeting late last month.

Is what had been characterized as a battle of onservatives versus radical theorists and feminists, holwig Koonon, professor of classics at the University (Michigan, was chasen as president-elect, and Richard F. Thomas, a professor of Greek and Latin at Harvard University, was elected to the board.

Afterthe election, Mr. Thomas said in an interview: Ademocratic process has exposed the muneuvering of a graps out of step with the rank and file."

Mr. Thomas, who moonted the write-in campaign, githe and others had been concerned that the official andidates for president-elect, Helene P. Foley, ofessor of classics at Barnard College, and Marilyn Arthur Katz, professur of Greek at Wesleyan University, wereless senior and less distinguished" than other possible eandidates. "Both teach at elite private situtions, and both do similar kinds of work," Mr. Momas said. He also was displeased that "the two were minated by a committee, whose six members had all been nominated by the committee while both professors sere on said committee."

After the University of Maine's Orono campus lost biblismesident and interim president to Florida, it's ambably no wonder that no one from that state is on the istoffinalists to head the camous (Date W. Lick, president. sanamed president of Florida State University last March, and John C. Hitt, provest and interim president, wasnamed president of the University of Central Perida in December.

The finalists, all of whom are scheduled to visit the compus this munth, are:

#H. Ray Hoops, vice-chancellor for nearlenne affairs the University of Mississippi since 1988.

*Frederick E. Hutchinson, senior vice-president for scalemic affairs and provest at the Ohio State Huiversity. Mr. Hutchinson received his bachelor's and master's regressit the University of Maine and is a former viceresident for research and public service at its Drain

* L Michael Orenduff, president of the University of Maine at Farmington since 1988.

John E. Van de Wetering, president of the State hiversity of New York College at Brackport since 1981.

The University of Illinuis at Chicago has assumed Aministration of the National Pingerprint Program for Child Identification. Founded in 1983 by Diane G. Apa, repregram will be part of the University of Illinois's new Office for the Study of Child Victimization, which will bedirected by Ms. Apa and housed on the campus of agamon State University, which shares a grant with heChicago campus to conduct research on the problem of missing children.

Afterfiveterms as mayor of Houston, Kathy Whitmire miljointhefaculty of Rice University on February 1. She will believe on public affairs, do research, and help agaize conferences and symposia.

Roger Mudd is leaving "The MacNeil-Lehrer News where he has been senior correspondent, to accept the Ferris Professorship of Journalism for 1992 at Proceson University.

A SPECIAL PULL-OUT SUPPLEMENT

Events in Academe

Spring-Summer 1992

You'll want to save this extraordinarily useful compendium of meetings, conferences, seminars, and other noteworthy events in higher education this coming spring and summer. It will feature listings by subject, sponsoring organizations, and dates, with names, addresses, and phone numbers of the people to call upon for detailed information and application forms.

Be sure to reserve advertising space.

To call extra attention to the events you sponsor, you're invited to insert an advertisement in this special section of The Chronicle. Derdline for space reservations and materials: Friday, January 31. Phone our Display Advertising Department today: (202) 466-1060; ask for Lauren

Listings in the reference columns of this special supplement are free, but publication of meeting announcements is at the discretion of the editors.

The Chronicle of Higher Education 1255 Twenty-Third Street, N.W., Washington, D.C. 20037

MAXIMIZING

national conference

February 23 - 26, 1992 Myrile Beach, South Caroline Sponsored by - The University of South Carolina

Now, more than any time in recent history, institu tions of higher education are facing critical challenges to utilize idle space, minimize down time, meet existing summer employment conditions, defray operating costs, and generate income. Specifically designed to focus on the pervasive importance of developing and maintaining successful summer programs, Maximizing Summer Oppurtunities will nelp you generate that new vitality.

Registration Information available now!

WORKSHOPS

European Perspectives on Waste Management

A Workshop Designed for Environmental Professionals

May 18-20, 1992 Rewley House-University of Oxford

This important workshop is being offered as part of a consortium involving the University of Oxford, Oxford, England; California State Polytechnic University, Pomons, California, U.S.A.; and the University of Strathelyde, Glasgow, Scotland. The primary purpose of the workshop is to present the most current European perspectives on waste management. The workshop will be an exciting opportunity for important international oxehanges surrounding the critical issue of environmental management.

For a detailed brockure, call the Office of Continuing Education at Col Poly University Pomona, CA 714-869-2288.

Teaching Writing and Social Difference

Workshops on Innovative Instructional Practices

April 25-27, 1992 Chicago, Illinois

This program offers three days of workshops on teaching writing and critical thinking in courses which engage questions of social and cultural difference. Discussion sessions will join faculty with participants in assessing relative merits and limitations of various pedagogical approaches to these issues,

Institute Faculty include:

David Bartholomae • Gregory Colomb • Marilyn Cooper • Thomas Fox · Tohy Fulwiler · Susan Jarratt · John Trimbur · Joseph Williams
